avdologe Subject :

Operational Report - Lessons Learned, lOlst Airborne Division (Airmobile), Fariod Ending 31 July 1970, RCS CSFOR-65 (R2) (8)

- 1. (C) Operations: Significant Activities.
  - m. (C) Operations.
- (1) Operation TREAS STAR commenced on 1 April 1970 and has continued throughout the entire period of this report. The operation was developed in close coordination and cooperation with the 1st Inf Div (ARVM) and Thus Thien Province and Sector officials to continue to provide territorial security for the accomplishment of pacification and development in the populated low-lands; dumy the enemy access to the populace and resources in the coastal areas; and to seek out and destroy enemy forces, base areas, and cache sites.
- (a) The let and 3d Edea and reconnaissance assets of the division have been employed to maintain a protective shield beyond the periphery of the populated lowlends of Thua Thien Province to prevent incursions of enemy forces into the populated area, and insure a secure environment for continued progress of the province pacification and development progress for 1970. The base operated in close coordination with the let, 3d, and 54th Regts (ARVN), conducting extensive patrols, surveillance, and accurity operations in assigned ACs to deny the use of these areas to the enemy. Combat operations by infently elements work supported by direct and general support artillery fires, provided from mutually supporting fire support bases, secured by elements of the bde and located on a broad front beyond the periphery of the lowlend areas. Combined sirmobile operations were conducted within assigned ACs to eliminate enemy forces, bear areas, and cache sites.
- (b) The 2d Bde has been employed in the populated lowlands, piedmont and eastern edge of the canopy in coordination with the 3d and 54th Regts (ARVN), to coordinate and support the pacification and development program, conduct security operations on the edge of the canopy, and secure sustained fire support bases to provide direct support artillery coverage of the area of operations. The 2d Bde coordinated and directed assistance for the ten rural districts of Thum Them Province and assisted in the achievement of the eight goals of the 1970 Pacification and Development Plan (Reported in ORLL for pariod suding 30 April 1970).
- (c) An informal area coordination committee (ACC) was established, composed of the CG, lat Inf Div (ARVS); Frevince Chief, Thus Thien Province; CG, 101st Abn Div (Ambl), and the Senior Advisor CORDS, to insure that the efforts of all forces operating in the province are in agreement and focused toward the same objectives and goels. Through this means, priorities were established for pacification, civic action projects, and the employment of military forces required to upgrade the degree of security and promote pacification and development in specified areas.

Group 4 Downgraded at 3 year intervals; Declassified after 12 years.

AVDG\_GC SUBJECT :

Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOX-65 (R2) (8)

- (2) The division sesumed operational control of Det B-52, 5th SFG (A) (Project Delta), on 10 May 1970 at SFOB Mai Loc, YDO94518. The detachment began Operation BARGER GLADE on 15 May to conduct deep covert recommande and tactical exploitation of intelligence and to interdict enemy infiltration and supply routes in the the Sanh Plain and Da Krong River Valley areas. These operations continued until 9 June, when the detachment terminated operations in western Quang Tri Province and prepared for movement to the Trang, RVN, for stand down. On 25 June Det 8-52, 5th SFG (A) resumed special recommaissance operations in the Delta AO, until 30 June 1970, when Operation BARBER GLADE was terminated. The detachment conducted a total of 38 ground operations, inserting elements to perform area and route reconnsissance and bomb damage assessment of air, artillery, and ARA strikes. The detachment accounted for 15 enemy KiA, 10 enemy trucks, two bulldozers, and a large excunt of supplies destroyed along Coute 616. Intelligence gathered by the detachment indicated that Route 616 was the main cupply route for enemy units in Quang Tri Province and the Lactian Salient area. The detachment also concluded that there was no indication of movement of major enemy units in the eres of operation, elthough the short duration of the second phase of the operation (25-30 June) precluded a complete and thorough coverage of the AO (After Action Report submitted separately by Det B-52, 5th SFG (A)).
- (3) Operation CLINCH VALLEX was initiated at 091315 July in response to the discovery of the 9th Regt, 304th NVA Division, infiltrating into South Vietnam. The mission of the 10let Abn Div (Ambl) was to provide combat support and combat service support for operations by the 1st Inf Div (ARVN) in the KHE SANN Plateau. During the operation, elements of the 3d 3ds and 3d Kegt, 1st Inf Div (ARVN) were employed in mestern Quang Tri Province to locate and destroy elements of the 9th NVA Regt, discovered by armed aerial reconnaissance elements on 8 July (After Action Interview Report submitted separately). Artillery was provided by XXIV Corps, 101st Ahn Div (Ambl), 1st Inf Div (ARVN) and the 1st 8ds, 5th Inf Div (Mech) to support reconnaissance in force operations by the 1st and 2d Battalions, 3d Kegt (ARVN). FRAGO 25 (CLINCH VALLEX) to OPCRD 2-70 (TEXAS STAR) suspended combined operations by the 3d Bde in the vicinity of fire support/operations bases (FS/OB) AIRBORNE, GOODMAN, and BRADLEY to located and destroy enemy rear service areas.
- (4) Operation CHISACO PEAK/LAM SON 363, in the mountains northeest of the A SHAD Valley, was originally scheduled to commence on 10 July, but was post-poned with the commitment of assets to Operation CLINCH VALLEY. The combined operation, employing elements of the lat Bde and 36 Regt (ARVH), was rescheduled to commence on 16 July and was to be conducted in two phases. Phase I (preparation) provided for a program of intensive preparatory fires by artillery, B-52, and tectical air south of FS/OB KIRCORD, in the FS/OB AIRBORNE/BEADLEY GOODMAN area, to deny enemy use of the terrain and destroy cache sites and bose

AVDG-GC SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Paried Ending 31 July 1970, RGS CSFOR-65 (R2) (V)

areas. Persistent and non-persisten 63 minitions were employed to deny enemy use of infiltration routes, for terrain restriction, and fire suppression.

Phase II (offensive) provided for the occupation of FS/OB MAURREN on 25 July by one US battalion, occupation by artillery on 28 and 29 July, and insertion of two battalions of the 3d Regt (ARVE) on 30 July, to locate and destroy enemy cache sites, logistical facilities, and interdict routes of resupply and communication of the 803d and 29th EVA Regiments.

- (5) FS/OB RIFCORD was opened in April 1970 as a key forward fire support base in the division's summer offensive plan against the 803d and 29th MVA Regiments. The fire support base was occupied and secured on 11 April by Co C, 2d Bn (Ambl), 506th Inf. Poor weather in the division AO delayed the movement of the battalion CP and Stry B, 2d Bn (Ambl), 319th Arty until 16 April. Stry C, 11th Arty (ARVM) was positioned on the firebase on 17 April to provide support for two battalions of the 1st Begt (ARVM). The light CP, 1st Regt (ARVM) collocated on the firebase with the CP, 2d Bn (Ambl), 506th Inf on 18 April, to facilitate combined operations in the area.
- (a) The 2d Bn (Ambl), 506th Inf continued security, patrol and ambush operations in the vicinity of FS/OB RIFCORD without significant enemy attacks, until 1 July 1970. The period 1-23 July was marked by increased enemy attacks by fire on and around the firebase and numerous ground attacks against units operating in the vicinity of the firebase.
- (b) In early July it became obvious that NVA forces were massing in an attempt to control the RIFCORD area. Elements of the 6th NVA Regt concentrated around the FS/OB generally to the north and west, joining the 29th and 803d NVA Regiments, operating east of the A SHAU Valley, south and scutheast of FS/OB RIFCORD. With the steady increase of indirect and enti-aircraft fire, and enemy ground attacks in the RIFCORD area, it became apparent, by the third week in July, that the cost and affort required for the self-defense of the firebase, placed the successful accomplishment of operations in the READLEY/AIRECANE area in jeopardy.
- (c) The closing of FS/OB RIPCORD would make troops available for offensive use against enemy supply caches and logistic installations to the rear of NWA forces massed around RIPCORD. The cache sites in the AIRBORNE/BRADLEI area were believed to be part of the base areas of the 803d and 29th NWA Regiments. The concentration of NWA forces around RIPCORD would further facilitate operations in areas to the south and southeast. Therefore, the decision to extract from RIPCORD was made.

3

AVEC-GC SUBJECT: Operational Report - Lessons Learned, 10lat Airborne Division (Airmobile), Period Ending 31 July 1970, ECS CSFUR-A5 (R2) (W)

- (d) RIP:000 operations were highly successful, causing heavy NVA casualties and drawing the enemy from his cache sites. His massing of forces around the firebone presented numerous targets vulnerable to heavy air and artillery fires. The 2d Sn (Ambl), 506th Inf was extracted, and FS/OR kIP:000 was closed on 23 July.
  - (6) G3 Air Activities:
- (a) During the reporting pariod, close air support sorties were flown in the division area of operation as follows:

•	May	<u>June</u>	<u>July</u>
Preplanned sorties	370	724	1130
Emmediate sortion	26)	103	207

<sup>(9)</sup> Operations Marrative. See Inclosure 1.

b. (C) Training.

<sup>(1)</sup> The seven-day program for battalion refresher training was initiated on 12 May 1970. This program provides two days for troop movement (the first and last) and five days for the communt of training and recreation. Companies are rotated for one-day stand downs at Eagle Beach during the five-day training period, allowing one day of recreational stand down and four days of training for each company. During the reporting period, all infantry battalions conducted refresher training, and three battalions completed a second refresher training cycle. Under the previous battalion refresher training program,

AVOG-CC SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

infantry battalions conducted ten days of training on a rotational basis. A separate program for recreational stand down was conducted, allowing infantry battalions a three-day recreational period at Regle Beach, on a rotational basis. This separate program caused that time required for a complete cycle of battalion refresher training to be excessive. The system was not flexible enough to respond to operational requirements, causing several postponements of refresher training. The new system is more responsive to operational requirements because of its decreased length and the fusion of recreational and training stand downs. It allows infantry battalions to conduct refresher training every 50-60 days. This increased frequency of training periods enables more effective integration of replacements, correction of unit tactical weaknesses, and implementation of lessons learned.

- Eagle Replacement Training School to train the Hac Bao (Black Panthers) Recommeissance Company of the 1st Inf Div (ARVN) in the use of aimobile techniques during small unit raids against selected enemy targets. The training program is eight days in duration, with subject areas in map reading and lend navigation, small unit aimobile operations, patrolling, and the use of demolitions. The training program is concluded with a field exercise against a target in the division recommensance zone, selected from division intelligence sources. Instruction is conducted by SERTS cadre; a special cadre team composed of one officer and four enlisted men from Company L (Manger), 75th Inf; and specialized instruction presented by the 326th Engr Bo, the 326th Med Bo, and the G2 imagery Interpretation section. Interpreters are provided by the 1st Inf Div (ARVN). The cadre team from Co L (Ranger), 75th Inf accompanies the platoon in all training, to include the field exercise. During the period of this report, three platoons completed the training, and an additional three platoons were scheduled to receive the training during the month of August.
- (3) The division continued its intensified training program in the populated leviands with one dedicated battalion and a varying number of mobile training teams. The dedicated battalion is assigned the mission of conducting operations in Phu Loc District, employing 100 percent of its assets and resources in pacification and development and upgrading the combat affectiveness of territorial forces. The district has had a long record of Viet Cong Infratructure (VCI) incidents. The battalion assists the district chief in all aspects of his administration, training, and operations. To accomplish this mission, the battalion headquarters is collocated with the district headquarters, and elements of the battalion conduct joint operations with Regional Force, Papular Force, and Peoples Self Defense Force units, down to and including squad level. All operations are integrated with those of the district forces. In coordination with MACV mobile advisory teams (MAT) and sector

AVDG-CC

SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

officials, RF and FF units are rotated to Phu Loc District to receive training with the dedicated battalion. On-the-job training is provided by the dedicated battalion through coordination with the district chief and district senior advisor. Training is tailored to the specific requirements of the unit being trained and is conducted primarily with equipment on hand and available to the unit being trained. In addition to the dedicated battalion, mobile training teams are provided by elements of the 2d Brigade to train and assist RF, PF, and PSNF forces throughout the lowland area. From 20 to 22 mobile training teams (MTT) were provided during the reporting period to assist territorial force commanders in the conduct of combat/security operations and training as required. The concept of employment of MTTs was changed on 19 May 1970 at the request of GVN officials. The primary role of the MTT had been to provide formal training. This has been changed to the technique of on-the-spot corrections during the conduct of operations as the primary instructional vehicle. Formal classes are presented only upon request of and for specific instruction desired by GVA officials. Three types of MTT's are employed. District (subsector) teams are organized to assist the district staff in improving training and operational effectiveness of FF platoons and PSDS in the district. Three of these teams were deployed as of 31 July 1970. Regional Force group tesus are organized to maintain liaison between RF group headquarters and US battalions. They assist the RF group commander and staff in improving the operational effectiveness of the staff and assigned companies. Emphasis is placed on MTT participation with RF companies on actual operations. Seven of these teams were deployed as of 31 July 1970. Separate regional force company teams are organized to improve the operational effectiveness of the separate RF companies by assisting and advising the RF company commander in the planning and conduct of all combat/ security operations. Dophasis is placed on MTT participation during the conduct of operations. Twelve separate company teams were deployed as of the end of this reporting period. All MITs operate in close coordination with the district chief and district senior advisor to identify weaknesses and take corrective action in an effort to upgrade the combat effectiveness of the territorial forces. A fixed, rigid program is avoided, and formal training is tailored to correct specific weaknesses of units. It is presented on a level commensurate with the skills required by the unit to perform its mission. During the three months of the reporting period, MIT's conducted training for one AF company group, 25 separate RF companies, 20 FF platoons, and 844 members of the PROF. They also participated in seven RF group operations, 99 company-size operations, 109 platcon-size operations, and 203 squad-size operations. This program of intensified training in the populated lowlands of the division area of operation has been extremely successful. It has substantially improved the capability of local forces and, more importantly, it has established a cadre that can continue its own development.

7

# CONFIDENTIAL

A 400-CC

SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Feriod Ending 31 July 1970, RGS CSFOR\_65 (R2) (U)

- (4) The lolst Avn Gp (Cbt) (Ambl) conducted classes on pathfinder operations from 4 to 15 May and from 25 May to 5 June. A total of 30 members of the 1st Inf Div (ARVN) received this training. On 22 and 23 May, a training team from the lolst Airborne Division Support Command (Ambi) conducted classes on helicopter load preparation for 106 members of the 48th ARVN Artillery Battalian at Bong Ha. Instruction included care, maintenance, and capabilities of air items and general aling load preparation procedures for artillery units. The lolst Airborne Division Artillery (Ambl) provided four separate teams consisting of one officer and one MCO to train artillery units of the 1st Inf Div (ARVN) in fire direction and firing battery procedures and techniques. Each unit received two weeks of training, and a total of 14 ARVN artillery batteries received this instruction.
- (5) During the reporting period, a readiness report was formulated for Hagianal Force (NF), Popular Force (PF), and Feoples' Self Defense Force (PSDF) elements. Data for the report are collected from Territorial Forces Evaluation System (TFES) reports, PSDF status reports, and weekly MTT reports. The readiness report provides a concise and comprehensive evaluation of the readiness level of four major areas of development personnel, equipment, training, and operational proficiency. Reports are prepared each month. The first two monthly reports were completed during this reporting period. Initial indications are that the report will provide an affective means of evaluating the development of territorial force units and will serve as a useful management tool for the deployment of divisional MTT resources.

#### c. (C) Chemical.

- (1) General. The division chemical section, with operational control of the 20th Chemical Detachment (CBRC) and the 10th Chemical Platoon (DS), performed a variety of chemical missions in support of division operations during the reporting period. A discussion of each type mission follows.
- (a) Airborne Personnel Detector (APD) Operations. The Airborne Personnel Detector continued to be employed as an intelligence gathering device to supplement and/or confirm other intelligence concerning enemy locations and activity. During April, all APD missions were conducted by the 2d Soundron (Airmobile), 17th Cavalry. Baginning in May, missions were performed by the let and 3d Brigades as well as by the 2d Sqdn (Ambl), 17th Cav. A total of 128 missions were conducted during the reporting period. APD reading indicated several areas where enemy activity had significantly increased, assisting the ability of division units to engage the enemy during his incursions into forward base areas. Routes of infiltration were engaged with artillery and eir strikes.

AVDG-GC SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, MCS CSFOH-65 (R2) 2(4)

- (b) Asriel Flame Operations. Serial flame missions were conducted in areas believed to be booby trapped, to clear fields of fire around fire support bases, to clear and expand landing zones, and to destroy suspected enemy positions and cache sites. Both CH47 and OHill sircraft were used in flame drop operations. A total of 52 flame missions was conducted during the period. As the weather in the division AO improved and division limits moved deep into the canopy, several new forward fire support bases were constructed and saveral abandoned bases reoccupied. Extensive clearing operations were confucted around perimeters to facilitate visual observation and to provide fields of fire. Bulk flame drops, using eight to ton \$5gallon drums of thickened fuel, were conducted utilizing an external gling load from a CH47 helicopter. In April and May, a total of 1992 drums of thickened fuel was dropped in 240 sorties during clearing operations. The principal fire support bases cleared were KIFCOMO, GRANITE, GLADIATOR, INCKASAN, FALCON, VEGHEL, STRIKE, KATHEYN, BRICK, and SHOCK. A major flame project was initiated and completed for the 2d kOK Marine Brigade in bo area 20 kilometers south of Do Neng during the months of April and May. The project was conducted to assist in clouring a booky trapped area, which had been chosen for resettlement by Vistnamese civilians, and to provide technical assistance and training for the MCK forces in the development of their own flame program. During the operation, 870 drums of thickened fuel were dropped in 67 mircraft sorties. A total of 13 secondary explosions was observed during the drops. The division provided a CH47 helicopter and necessary personnel for the execution of the mission. Division chemical officers explained concepts of employment and operational techniques in briefings at the ROK brigade headquarters. RUK forces assisted in the operation by marking target areas and rigging drop note. As a result of training provided by the division, ROK forces commenced their own flame drop program in coordination with the 1st Marine Division. Muring the month of May, three heavily booby tropped landing somes were cleared using flame fuel. As a result of the six sorties conducted, 27 large secondary explosions occurred.
- (c) CS Operations. Bulk CS2 missions were conducted, using both organic CH47 helicopters and Air Force high performance aircraft on routes of infiltration in the division recommissance zone. The drops and bombings were targeted to restrict heavy vehicular traffic, thus interdicting enemy tactical and logistic advances into forward base areas. Loads consisting of 55-gellon drums of CS2, rigged with the KM925 impact fuze and burster system, were dropped from CH47 aircraft from an approximate height of 4000 feat. Bulk GS2 missions, using BLU52 bombs, were conducted by Air Force high performance aircraft. These bombs were directed against roads leading into the northern A SHAU and the DA KRONG River Valley. Tactical CS missions were conducted

9

## CONFIDENT

AVBG-GC SUBJECT: Operational Report - Lessons Loarned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RGS CSFOR-65. (82) (U)

against suspected enemy locations, during combat essentits, in support of artillery raids, during search operations, and in support of combined US/ARVN operations. Tactical CS was employed in support of a lat Brigade artillery and air raid covering three distinct target areas. UNIH helicopters delivered CS on all targets. Two sircraft carried ten K158 CS canisters, while a third dropped 16 to 20 rocket tube assemblies, each containing 20 MTA) CS granades. Canisters were dropped from a height of 1000 feet, while granades were delivered at low level. A total of 80 canisters and 710 granades were dropped during the operation.

A tactical CS mission was conducted to support a seach operation of the 2d Sqdn (Ambl), 17th Cav. Four E158 CS canisters were dropped on target areas along the sweep route. Weather conditions did not adversely affect the retention of CS in the canopy vegetation. No ill affects were experienced by friendly ground troops.

A tactical CS mission employing 37 E158 canisters was conducted in support of a combined US/ARVN operation in the vicinity of FS/OB HENDERSON. To support troop insertions, manitions were employed on enemy mortar and automatic veapons positions directed against the proposed landing sones. Throughout the operation, tactical CS was employed on nine separate occasions on suspected enemy locations and during combat assaults without III effects to friendly troops.

(d) Aerial Defoliation Operations. Diesel defoliation missions were conducted around fire support bases in the piedment area, where herbicides, such as Agent Blue, could not be used due to the proximity of friendly crops. The diesel spray retarded the growth of the foliage and assisted in burning. Targets included areas adjacent to CAMP RACLE, CAMP EVANS, and FS/OB BIRMINGHAM to clear fields of fire.

Herbicide defoliation missions, using Agent Blue, to reduce foliage were executed against major NVA infiltration routes west of FS/OB RIFCORD. Areas around FS/OB RESTORNE and VEGHEL, and Moute 547 connecting them, were sprayed to create and preserve fields of fire. Plans were formulated to conduct increased herbicide operations around permanent fire support bases with the approach of the dry season.

(e) Smoke Operations. Smoke operations in support of combat assaults were conducted by the 158th Aviation Battalion (Ambl). The KM52 Integral Smoke Cenerator was used to create smoke acreens which effectively obscured enemy observation, limiting his capability to concentrate well simed fire on assaulting troops and aircraft.

AVDG-GC

SUBJECT: Operational Report - Lessons Lourned, 101st Airborne Division (Airmobile), Feriod Ending 31 July 1970, RGS CSFOR-65 (R2) (U)

The MAA2 smoke pot was used by the 1st Brigade in conjunction with psychological operations. A column of amoke, leating for a five hour period, was created and used as a reference point for enemy soldiers desiring to rally.

(2) Statistics: The following statistics pertain to chemical operations during the reporting period:

TYPS MISSION	NUMBER OF MISSIONS	AMOUNT
Airborne Personnel Detector	128	n/A
Flame Drop	52	1,989 druma
Tactical CS	25	459 E158R2 and 80 M7A3 grensdes
Bulk CS	16	56 drums and 76 BLU 52
Fougassa Esplacement	N/A	131 positions
Husch Flars Emplacement	n/a	18 positions
Aerial Defoliation (Merbicide	) 17	4,310 gallona
Aerial Defoliation (Diesel)	1	550 gallons
Protective Masks Inspected	n/a	4,265 masks
Bunker Seeding	N/A	105 JEBPOs

AVDG-CC

SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Pertod Ending 31 July 1970, RCS (SFOR-65 (R2) (II)

- d. (C) intelligence.
- (1) Enemy Situation
- (a) At the beginning of the reporting period, enemy units were incated · an follows:
  - 1 In Military Region Trie Thien-Hue (MRTTH), local force companies were operating in their traditional areas of operation - Phong Dien Special Action Unit (PDSAU, formerly C113) vicinity Phong Dien (D), Quang Dien Special Action Unit (QDSAU, formerly C114), vicinity YD4724, C115 vicinity YD6614, and Cll6 vicinity YD8304. The Phu Vang Special Action Unit (PVSAU) was unlocated. The Hus City Reconnaissance Battation (HCRB) was located vicinity YD6514. The Phu Loc Special Action Unit (PLSAU, formerly the Phu Loc Armed Battalion) and the 4th NVA Regiment continued to operate in the Phu Loc mountains. The 4th NVA regiment headquarters was located Vicinity YC9781 with the K4C Battalion vicinity ZC0193, and the K4B Battalion vicinity ZC1896. The 5th NVA Regiment was deployed south and southwest of Hue, with the headquarters vicinity YC5282; the 804th Infantry Battalion vicinity YC8195, the 810th Infantry Battalion vicinity YD5715, the 439th Inlantry Battalion vicinity YC6297, the K32 Rocket Artillery Battalion vicinity YG7299, the Chi Thua | Sapper Battalion vicinity YC6995, and the Chi Thua Suppor Battalion vicinity YC7290. The 6th NVA Regiment was deployed in econopy south of Phong Dien (D), with the regimental headquarters vicinity 1216: the 800th Infantry Battalion vicinity YD2922; the 802d Infantry Battal-Melalty YD2010; the 806th Infantry Ballalion vicinity YD4622; the K35 met Artillery Battalion vicinity YD3620, and the KIZ Sapper Battalion The 29th and 803d NVA Regiments of the 324B Division were see east of the A Shau Valley just south and southeast of the 6th NVA 1. The 19th NVA regiment headquarters was located vicinity YD4405. Bry Bettalion YD5307, the 8th Infantry Battallon vicinity YD4705. Infantry Beliation visitelty YD4907. The 803d NVA regiment head-Commission vicinity YD3415, with the 1st Infantry Battalion vicinity the tafastry Battalion vicinity YD4412, and the 3d Infantry Bat-Washin. The headquarters of the 324B Division was in Basc METTH beadquarters. The 675th NVA Artillery Regiment Area Lit. The IlA Reconnaissance Battalion headquarters the 7th Front was located in the vicinity of three 181, with headquarters vicinity YD1931, the 808th Infantry

SUBJECT: Operational Report - Lessons Learned, 161st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

Battalion vicinity YD2333, the 814th Infantry Battalion vicinity YD3737, the K34 Rocket Artillery Battalton vicinity YDZ636, the K10 Sapper Battalton vicinity YD3133, the K11 Sapper Battalion vicinity YD2842, and the K12 Transportation Battalion vicinity YD1327. The 812th NVA Regiment was engaged in logistic activity in support of the 7th Front, with its headquarters vicinity YD2025, the 4th Infantry Battalion vicinity YD2426, the 5th Infantry Battalion vicinity YD0023, and the 6th Infantry Battalion vicinity YD2025.

2 In the H5 (DMZ) Front, at the beginning of the reporting period, there were ten units operating in the DMZ and in western Quang Tri (F). The 52d NVA Regiment, 320th Division remained in the northwestern corner of Quang Tri (P). The 246th NVA Regiment was operating in the western portion of the central DMZ, with headquarters vicinity XD9371, the 1st Infantry Battalion vicinity XD9455, the 2d Infantry Battalion vicinity XD8363, and the 3d Infantry Battalion vicinity XD9461. The headquarters of the 27th NVA Regiment was located vicinity YD0668 with the 1st Infantry Battalion vicinity YD0563, the 2d Infantry Battalion vicinity YD0570, and the 3d Infantry Battalion vicinity YD0459. The 75th Anti-Aircraft Battalion was operating vicinity XD9561. The 84th and 164th NVA Artillery Regiments were alternating fire support responsibility in the central DMZ area. The headquarters of the 84th NVA Artillery Regiment was located vicinity XD9874, and the headquarters of the 164th NVA Artillery Regiment was located vicinity YD1090, The 126th Naval Sapper Regiment was located vicinity YD2189. The newly arrived 66th NVA regiment headquarters was located vicinity YD0335, with the 7th Infantry Battalion vicinity XD9841, the 8th Infantry Battalion vicinity YD0138, and the 9th Infantry Battalion located in the Ba Long Valley. Forward elements of the 304th Division were operating south of the Khe Sanh Plateau vicinity XD8436. Elements of the 27th Battalion, 31st NVA Regiment were operating in the Quang Tri (P) lowlands, with the battalion and regimental headquarters in North Vietnam, vicinity YD1185. The 270th NVA Regiment remained located north of the Eastern DMZ vicinity YD1986. The 33d Sapper Battalion, B5 Front was operating in the vicinity of XD9939,

#### (b) May 1970

1 There was a significant increase in activity by NVA units in Military Region Tri-Thien-Hue (MRTTH) during the month. The 5th and 6th independent Regiments were responsible for attacks by fire on Allied installations in the lowlands. Enemy activity and PW reports confirmed the eastward deployment of the 812th NVA Regiment. The mission of the 812th was to

AVDG-GC

SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

protect rear areas and support 7th Front and 6th Regiment incursions into the populated lowlands of Hai Lang and Phong Dien Districts. A PW, captured on 4 May, listed as a penetration agent for MRTTH, stated that the 7th Front had the mission of reconnaissance and attack on the boundary areas of Hai Lang and Tricu Phong Districts, Quang Tri (P), in order to demonstrate the strength of the VC/NVA movement to villagers in these areas. 7th Front incursions into Hai Lang (D) later in the month confirmed this mission. A PW report on 4 May indicated that elements of the 6th Regiment had linked up with the 803d MVA Regiment in order to coordinate rear service activities vicinity FS/OB RIPCORD and Co Pung. US forces operating vicinity FS/OB GRANITE and FS/OB MAUREEN encountered heavy 12. 7mm, mortar, RPG, and small arms fire during the month of May. The discovery of 60mm and 82mm C5 mortar rounds at YD4411 (I KM E of FS/OB MAUREEN) and the use of chemical delay fused mortar rounds at FS/OB KATHRYN indicated that the 803d NVA Regiment received logistic priority along Route T7 during April and early May.

2 DMZ activity during the month of May was characterized by attacks by fire in the FS/OB FULLER/CAMP CARROLL area. The presence of the 66th Regiment, 304th NVA Division, in the Da Krong River Valley increased the enemy threat in central Quang Tri (P). The 66th Regiment launched two sapper attacks on Allied firebases during the month, resulting in heavy enemy losses. The 66th Regiment was the target of a B52 strike early in the month, resulting in 97 NVA KIA. Aerial surveillance in the 66th NVA Regiment area of operations indicated heavy logistic activity in the vicinity of the Laptian Salient.

#### (c) June 1970

In Military Region Tri-Thien-Hue, the 7th Front remained inactive throughout the munth, possibly recovering from losses suffered in late May following incursions into Hsi Lang (D). The \$12th, 803d, and 29th NVA Regiments continued to occupy well established mountain base areas east of the Da Krong and A Shau Valleys. The mission of these units was to lure US and ARVN forces deep into the canopy, leaving the coastal lowlands exposed to infiltration by the 7th Front in southwestern Quang Tci (P) and by the 4th, 5th, and 6th independent Regiments in Thua Thien (P). The \$12th NVA Regiment continued to provide logistic support to the 7th Front and to support attacks against ARVN firebases in the central canopy. The 29th NVA Regiment

14

AVDG-GC

SUBJECT: Operational Report - Lessons Learned, 101st AirbornelDivision (Airmobile). Period Ending 31 July 1970, RCS CSFOR-55 (R2) (U)

shifted its area of operation west to avoid detection and destruction by Allied forces applying pressure from the east. The 803d NVA Regiment showed signs of increased offensive activity and attack preparations in the FS/OB RIPCORD and FS/OB MAUREEN areas. The 4th NVA Regiment launched a coordinated attack against five allied installations in Phu Loc District on 10 June and then returned to its normal low level of activity for their emainder of the month. The 5th and 6th NVA Regiments increased the number of attacks by five against Allied forces using 60mm and 82mm mortars and 122mm rockets.

2 Enemy DMZ activity during the month of June was at is lowest level since prior to April 1970. Enemy forces in the central DMZ reduced their attacks by fire in the FS/OB FULLER/CAMP CARROLL area in order to resupply and reposition in preparation for future offensive actions in July or August. During the month, there was a significant increase in activity in western Quang Tri (P) and in the Laptian Salient. There were indications that the 9th NVA Regiment, 304th Division was infiltrating into the area to join the 66th NVA Regiment. On 21 June, a map overlay was captured in the Vietnamese Salient by the HAC BAO Company. Ist Infantry Division (ARVN), showing telephone lines from forward elements of the 304th Division, located in the Laptian Salient, to the 7th Front located to the mortheast:

#### (d) July 1970

(1) In Military Region Tri-Thien-Hue, the majority of enemy initiated activity was recorded in the FS/OB RIPCORD area, where elements of the 6th and 803d NVA Regiments had begun to mass. On 17 July, the firebase received 120mm mortar fire. This was the first use of that weapon in the MRTTH area of operation in over 18 months. The enemy continued to intensify his mortar and ground attacks against US units operating vicinity FS/OB RIPCORD until 23 July, when the firebase was closed. There was a significant decrease in 29th NVA Regiment activity, with indications that the unit had withdrawn west. At the beginning of the month, elements of the 7th Front tried again to enter eastern Quang Tri (P) lowlands, resulting in 135 NVA KIA and 17 PWs captured. Enemy units were identified as the 808th Battalion, 7th Front, reinforced by the 1st Company, K6 Battalion, 812th NVA Regiment and a signal squad from the K4 Battalion, 812th Regiment. Activity in the 4th and 5th NVA Regiment areas of operation remained at a low level, except for attacks by fire against Allied installations in the lowlands in early July.

AVDG-GC

SUBJECT: Operational Report - Lessons Leagued, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

- (2) In the B5 (DMZ) Front, enemy initiated activity was relatively light in July, although movement throughout the DMZ continued at a high level. The number of attacks by fire declined from 67 in June to 45 in July. During the latter part of July, in the central DMZ, the 84th and 164th Artillery Regiments resumed attacks by fire on FS/OB FULLER and C-2 Combat Base. Ground contacts decreased by approximately 50%. The most significant contact during the month occurred in western Quang Tri (P) on 8 July. when Allied forces suprised elements of the 9th NVA Regiment, 304th NVA Division, attempting to infiltrate into SVN. Air Cavalry elements and troops, supported by helicopter gunships, engaged and killed 139 NVA in the Khe Sanh plains and captured four PWs. The PWs stated that the lat and 2d Battalions of the 9th Regiment were to control the region in the vicinity of Kha Sanh and south of the Ba Long Valley. They also stated that elements of the 2d Battalion, 246th NVA Regiment were operating in western Quang Tri (P). The presence of the 9th and 66th Regiments, 304th NVA Division confirmed the enemy's determination to protect his lines of communication and base areas which had been established in that area. This build-up of NVA forces in western Quang Tri (P) also threatened Allied installations and population centers north and northeast of the Ba Long Valley.
- (e) At the end of the reporting period, enemy units were relocated as follows:

1 In Military Region Tri-Thien-Huc (MRTTH). Local force companies relocated were the Phong Dien Special Action Unit, vicinity YD3528, the Quang Dien Special Action Unit, vicinity YD5122, and the Phu Vang Special Action Unit, vicinity YC9398. The 5th NVA regiment headquarters was relocated vicinity YC6382, with the 804th Infantry Battalion vicinity YC9398. The 6th NVA Regiment, while still deployed in the camppy south of the Phong Dien (D) pledmont, concentrated more around the FS/OB RIPCORD area. Battalions of the 6th Regiment relocated were the 800th Infantry Battalion vicinity YD3725, the 802d Infantry Battalion vicinity YD3018, the 806th Infantry Battalion vicinity YD4224, the K35 Rocket Artillery Battalion vicinity YD3620, and the K12 Sapper Battalion vicinity YD3423. The 29th and 803d NVA Regiments of the 324B Division were operating east of the A Shau Valley just south and southeast of the 6th NVA Regiment. The 29th NVA regiment headquarters was located vicinity YD4306, the 7th Infantry Battalion vicinity YD4906, the 8th Infantry Battalion vicinity YD4807, and the 9th Infantry Battalion vicinity YD4208. In late July, an unidentified transportation battalion was reported to be operating vicinity YD2914. The 7th Front was still located in the vicinity of former Base Area 101, after

AVDG-GC

SUBJECT: Operational Report - Lessons Learned, 101st Airhorne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

having made several costly incursions into the lowlands during the reporting period. The battalions relocated in the 7th Front were the 808th Infantry Battalion vicinity YD3339, the 814th Infantry Battalion vicinity YD2840, the KiO Sapper Battalion vicinity YD3534, the KiI Sapper Battalion vicinity YD2546. The 812th NVA Regiment continued logistical and offensive activity in support of the 7th Front. The 4th Infantry Battalion was relocated vicinity YD2834, the 5th Infantry Battalion vicinity YD1829, and the 6th Infantry Battalion vicinity YD2730. The Ki9B (AKA 20th) Sapper Battalion, 304th NVA Division, under the operational control of the Bl2th Regiment, was located vicinity YD1927.

2 In the B5 Front, at the end of the reporting period, there were cleven units operating in the DMZ and western Quang Tri (P) areas. The 52d NVA Regiment, 320th Division is no longer carried in the northwestern corner of Quang TrI (P); it is most likely located in North Vietnam. At the end of the reporting period, the 2d Infantry Battalion, 246th NVA Regiment was located vicinity XD7944. Forward elements of the 304th NVA Division moved farther south, vicinity XD9922, and were reinforced by the newly arrived 9th NVA Regiment. The 9th NVA regiment headquarters was located vicinity XD7738. with the 1st Infantry Battalion located vicinity XD7740, the 2d Infantry Battalion vicinity XD8236, and the 3d Infantry Battalion near the western Quang Tri (P) border west of Khe Sanh. The understrength 66th NVA Regiment, 304th Division was operating in western Quang Tri (P), with the headquarters element vicinity XD9533, the 7th Infantry Battalion vicinity XD8832, the 8th Infantry Battalion vicinity XD8930, and the 9th Infantry Battalion vicinity YD0530. The 270th NVA Regiment remained located north of the eastern DMZ, vicinity YD1986, with its 4th Battalion periodically making incusions south of the DMZ.

- (2) Viet Cong Infrastructure (VCI) Activities in Thua Thien (P)
- (a) The number of VC/VCI related incidents decreased slightly from 47 in April to 42 in May. Kidnappings, sabotage, and rice collections remained at the same level as reported during April, while propagands activity decreased sharply. Terrorism and assassinations increased during May. Enemy attacks by fire directed against ARVN and GVN installations in the lowlands increased to five attacks during May, compared to two in April. That activity was believed to have been politically rather than militarily motivated, due to the numerous Vietnamese holidays in May. NVA infiltration into the lowlands increased from three incursions in April to six in May. All of these incidents occurred in Phu Loc (D), and can be attributed to elements of the 4th and 5th NVA Regiments. This increase possibly means that NVA operations have been

AVDG-GC

SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

extended into the lowlands to assist VC/VCI forces in disrupting the GVN pacification and development program. VC/VCI activity in Phong Dien (D) intensified during May, with increases in terrorism, sabotage, and kidnapping. Further evidence confirmed the reorganization of the C113 Local Force Company into local guerrilla units operating throughout Phong Dien (D). During the month of May 1970, a total of twenty-four VCI cadre was eliminated by Alkied operations in Thua Thien (P). Of this number, nine were considered significant by current MACV standards.

(b) The number of VC/VCI related incidents decreased from 42 in May to 36 in June. Of the total incidents, 67% involved sabotage, kidnapping, assassination, or terrorist activities. The overall decrease of VC/VCI related incidents can be attributed to a full in enemy activity from 19 to 25 June, when no incidents were reported. Enemy activity resumed on 26 June and continued through the end of the month. During June, the NVA launched a series of attacks by fire against Allied installations in the lowlands. The enemy employed 60mm mortars, 82mm mortars, and 122mm rockets during these attacks. US installations shelled during June include CAMP EVANS (4, 8, and 26 June), CAMP EAGLE (twice on 26 June), FS/OB LOS BANOS (10 June), and FS/OB TOMAHAWK (10 June). FS/OB TOMAHAWK was the only installation in which the standoff attack was immediately followed by a ground assault. FS/OB ROY, an ARYN installation, was also attacked by fire on 10 June. GYN installations shelled during June include the Phy Trach Bridge (26 June), Phong Dien (D) HQ (4 and 26 June), Phu Loc (D) HQ (10 June), and Nuoc Ngot Bridge (10 June). It is important to note that the majority of the attacks by fire occurred on 10 and 26 June. It is possible that the 4th, 5th, and 6th NVA Regiments increased their offensive operations in the populated areas in order to take advantage of US and ARVN presence in the western canopy. In Phu Vang (D), on 29 June, two election officials were attacked by three VC/VCI, resulting in one election official killed, one election official wounded, and one ARVN soldier killed. The Primary VCI objective was to show the populace what will become of those who actively participate in any activity which would enhance GVN control of the populace. During the month of June, a total of 31 VCI cadre was eliminated by GVN and Allied operations within Thua Thien (P). Of this number, cleven were considered significant under current MACV standards.

AVDG-GG

SUBJECT: Operational Pepert - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, FCS CSFOR-65 (R2) (U)

(c) The number of VC/VCI related incidents increased from 36 in June to 38 in July. Of the total incidents, 50% involved sabetage, kidnapping, assassination, or terrorist incidents. The overall increase of VC/VCI related activity can be attributed to an increase of enemy activity in Phong Dien and Harn Hoa Districts. An increase in rice collections was noted throughout the lowlands, indicating that enemy terrorist activity was hampered by the need for foodstuffs. VC/VCI activity in Phong Dien (D) showed increases in acts of terrorism, kidnappings, assassinations, and rice collection. The majority of terrorist incidents involved attacks by fire on GVN installations and hamlets. A marked increase in VC/VCI related incidents was noted in the reacttlement areas of northern Phong Dien (D). These were the first significant incidents in the area since its founding in Jamiary 1970. During July, enemy forces operating in the lowlands launched a series of attacks by fire against Ailled, ARVN, and OVN installations. Allied bases shelled in July include CAMP EAGLE (7 July), CAMP EVANS (26, 28, and 29 July), FS/OB T-BONE (22 and 28 July), and the VANH TRANH Training Center (5 July). Significantly, two of the attacks by fire on CAMP EVANS occurred during daylight hours. There were seven reported attacks by fire against GVN installations during July, compared to six in June. Attacks directed against 118 installations decreased from seven in June to four in July. During the month of July, a total of 24 VCI cadre was eliminated by GVN and Atlied operations within Thua Thien (P). Of this number, eight were considered significant under MACV standards. The following table compares the VC/VCI incidents for May (left), June (center), and July (right) by district:

District	Fin/Econ	Prop	Sab	Intel	Y,id	Assas	Terror	Total

AVDG-GC

SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 [RZ] [U]

- (3) G2 Air Operations.
- (a) Prior to 1.May, all photo and IR missions were passed to XXIV Corps for processing. The direct support concept was introduced on 1 May. All missions which Mohawk aircraft were capable of flying were assigned by the 101st Abn Div (Ambl) directly to the 131st Surveillance Airplane Company (SAC). This proved to be more effective and enabled the division to establish priorities which resulted in a more responsive surveillance plan.
- (b) The 01-D sorties allotted from the 220th Reconnaissance Airplane Company (RAC) were used in a new capacity. The aircraft were tasked to fly night surveillance around fire support bases which had received indirect fire during the hours of darkness. By sighting flashes and directing airstrikes and artiflery these night surveillance missions proved to be effective in reducing the intensity of enemy indirect fire.
  - (4) G2 Ground Surveillance Operations.
- (a) On I June, the Dart I sensor readout station became operational. After a two week evaluation period, the responsibility for the readout and interpretation of sensors in the division reconnaissance zone passed from the BATCAT (EC-12I) aircraft to the Dart I facility at Quang Tri Combat Base. Reports of sensor activations are passed immediately to the Ground Surveillance Section, 101st Abn Div (Ambl) and 1st Ede, 5th Inf Div (Mech) via direct telephonic communication for quick reaction and intelligence use.
- (b) During the reporting period, the number of ground monitor sites increased to eleven with establishment of sites at FS/OB RIPCORD (YD3419), FS/OB BRICK (YC8399), FS/OB KATHRYN (YD4711), FS/OB VECHEL (YD5503), and FS/OB RAKKASAN (YD4919). These additional sites reflect the offensive posture of ground tactical units in their operations to the south and west against elements of the 6th, 29th, and 803d NVA Regiments. At the end of the reporting period, two of these sites, FS/OB RIPCORD and BRICK, were closed, with relocations planned to support future operations.
- (c) During the month of June, sensor-detected activity increased in the division recommissance zone to over 100 activations per week. A high of 190 was reached for the period 21-27 June. The major increases in sensor-detected activity occurred along OL-9, Route 616, and Route 9222. Confirmation of increased enemy activity in these areas, by visual recommaissance, led to the employment of aerial bombardment and insertion of ground units.

AVDG-GC

SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

- (d) During the reporting pariod, the number of operational RF sensor strings in the division area of operation, increased from 76 to a new high of 147, enabling the division to meet its minimum goal of one set per rifle/ recon plateon. Operational USD/W1s increased from 42 to 63. Forty-two Balanced Pressure systems (BPS) and seven Infrared Intrustion Detectors (IIDs) were added to the inventory for base defense of Camp Hochmuth (Phu Bai Combat Base).
  - (5) Counter Intelligence Section
- (a) The CI Section, 101st Military Intelligence Company, engaged in a variety of activities in support of its primary mission of safeguarding the 101st Abn Div (Ambl) from enemy sabotage, espionage, and subversion. 1G and CI inspections of personnel, documents, and physical security programs were conducted to detect and eliminate security hazards. Technical support, in the form of fingerprinting, safe combination changes, recovery of lost combinations, and repair of security containers, was continuously provided both by division and supporting CI teams.
- (b) Personnel security investigations, complaint type investigations, and limited investigations to insure the validity of security clearances were conducted in the division. Clearances for 1986 replacements were validated; 471 SECRET clearances were granted; 3568 local files checks were conducted; and 431 intelligence record checks were forwarded to higher headquarters by the personnel security investigations (PSI) section. Additionally, 115 BI and NAC requests were processed.
- (c) The base camp security program was enhanced by the establishment of liaison with the Industrial Relations Division, Phu Bai. The intent of this liaison is to increase the number and effectiveness of informants. During the reporting period, the CI section recruited 30 new informants.
- (6) G2 Plans/Order of Battle Section. The G2 plans/order of battle section continued to monitor and record the enemy situation throughout northern I Military Region, with increased emphasis in disseminating collected intelligence. The order of battle handbook was updated during the reporting period to maintain an accurate description of enemy units operating in Quang

AVDG-GC

SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

Tri and Thua Thion Provinces. The division intelligence collection plan was published on I June. The collection plan contains essential elements of information (EEI) needed on the enemy mission, organization, and area of operation. Wide distribution of the plan was made to higher, adjacent subordinate, and supporting organizations with an intelligence collection capability.

- (7) Interrogation Section, 101st Military Intelligence Company. During the reporting period, the interrogation section, 101st Military Intelligence Company (Divisional) processed 13 prisoners of war (12 NVA, one VC), three Hoi Chanh (NVA), and 124 batches of captured enemy documents.
- (8) Weather. The Air Force weather team, 5th Weather Squadron, continued to provide meteorological support for the 101st Abn Div (Ambl). The weather team provides climatological information, weather forecasts for individual flights by Army aviators, current weather reports for field commanders, weather summaries used in the evaluation of past operations, and daily weather advice and interpretation for the commanding general and his staff.

### (a) May 1970

- 1 During May, the total rainfall was normal, approximately equal to the mean average of 4.0 inches. Due to the sporadic nature of precipitation during the month, some areas received more rain than the mean. The total rainfall was 4.04 inches and occurred on 12 days, twice the normal frequency. Thunderstorms occurred over the mountains on 20 days. Low cloudiness occurred on more days than normal. Ceilings below 1500 feet were observed on 8 days. No ceilings less than 300 feet were observed. No fog occurred. The average high temperature was 94°F, and the average low temperature was 77°F, both of which are 2°F warmer than the average expected for May.
- 2 May afforded the first full month of good weather throughout the division AC. Airmobile operations were hampered on five days during May (14-16 and 20-21 May), and one B52 air sortic was cancelled on 13 May.

#### (b) June 1970

1 During June, the total rainfall was 4,2 inches, 1,2 inches above the average. Precipitation fell on 11 days, twice the normal frequency.

### **BLANK**

АУРО-ОС

SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

#### e. (U) Personnel.

- (1) Chaplain. During the reporting period, the division provided continuous chaplain support to all assigned and attached units. A total of 4,381 religious services was conducted with an overall attendance of 65,878. Six of the division's 24 chaplains departed during the month of July, creating a considerable personnel problem.
  - (2) Personnel management.
- (a) During the reporting period, total division assigned strength declined from 107.4% of that authorized on 1 May to 97.3% at the end of July. Availability of 11 series MOS personnel declined by 14%, resulting in a serious depletion of line company effective strength.
- (b) Prior to 1 July, the USARV reenlistment goal was placed at a monthly reculistment rate of 0.5% of operative strength, counting only first term RA and AUS reenlistments. As of 1 July, the goal was doubled, and all reenlistments counted. At this time, a prohibition was imposed on reculistments out of 11, 12 and 13 series MOS into non-combat MOS. The average monthly reculistment total for the previous reporting period had been 194. May reculistments totaled 205; June, 145; and July, under the new criteria, 64.
- (3) Finance. During the reporting period, the division finance office established the 101st Mobile Finance Forward Team (MFFT) to provide full spectrum finance services to personnel located on fire support bases. The team periodically visits fire support bases, permitting personnel to benefit from services such as partial payments, allotment changes, sale of treasury checks, collection for the savings desposit program, and acceptance of pay inquiries. The team is made available to all commanders located beyond the normal service capability of the present forward finance offices.
- (4) Changes in command and staff. During the reporting period the following changes in command and staff assignments occurred:

CG	₩ J.J. Hennessey	succeeded MG J.M. Wright	on 25 May
ADC(O)	BG S.B. Berry	succeeded BG J.J. Hennessey	on 2 Jul.

### f. (C) Logistics.

- (1) General. Logistic support for all division operations was provided through the DISCOM forward service support elements (PSSE), using the concept of area support. Throughout the period, a determined effort was made to reduce helicopter blade time whenever possible by using vehicular transportation.
- (a) To more effectively support Operation CLINCH VALLEY (9-15 July), a forward refuel point was established at Mei Loc and a rearm point at Quang Tri. A forward element of the 3d FSSE deployed to Quang Tri in support of two ARVN battalions, the 2d Sqdn (Ambl), 17th Cav, and the 2d En (Ambl), 502d Inf for the duration of the operation.
- (b) In support of Operation CHISAGO PEAK/LAM SON 363, the 11 refuel points at CAMP EVANS were expanded to 25, while an additional 11 points were established at FS/OB MIRMINGHAM. All classes of supply were drawn from the 3d FSSE at CAMP EVANS.
- (c) Super contact teams continued to provide personnel and squipment maintenance services to units returning from operations for stend down. The number of company size units supported were as follows:

- (2) DISCOM was tasked to provide civic action support in District II, Hue City and to assist Thus Thier Province in upgrading the capabilities of the Sector Maintenance and Direct Support Logistic Center (SMSDSLC). At the end of the reporting period, five of the original II projects had been completed, and three more had been added to the tesk list. Approximately 85% of DISCOM's goal for the initial phase of the SMSDSLC project had been completed by the end of the reporting period.
- (3) On 1 July 1970, the 5th Transportation Bottalion (Aircraft Maintenance and Supply) (Ambl) began work on a prescribed load list (FLL) to support three UHLM aircraft scheduled to arrive in the division on or about 1 September 1970. The FLL was completed, and all requisitioning accomplished, insuring the availability of all perts in advance of arrival of the aircraft. Special emphasis was also placed on the requisition and procurement of special equipment needed to accomplish the bettalion mission. At the end of the reporting period, the current authorized stockage list (ASL) for both Company A and B totaled approximately 11,000 lines. On 1 June, the quick reaction assistance team (QRAT) provided by the 34th General Support Group arrived to assist in the pulling, packing, and shipping of approximately 3,000 lines of identified excess stock.
- (4) The 5th Trans in (Acft Maint and Sup) (Ambl) provides direct support for repair of 424 aircraft authorized in the division. During the reporting period, 513 aircraft were repaired and released to division aviation units. Five 12th preventive maintenance periodic inspections on CH47 circraft (Operation Hock) were completed during the period, requiring an average of 16 days and 1,132 manhours per aircraft.
- (5) The SOIst Maintenance Battelion (Ambl) technical supply continued to process an average of approximately 20,000 requests per month. Demand accommodation fluctuated somewhat on a weekly besis, with the average for the period at 79.5%. The beginning of the period marked a very low 65% customer satisfaction average for the month of May. At this time the technical supply sativity still had a 39% zero balance. Intensive studies were initiated, and the material release expeditor (MME) teams were strengthened. As a result, receipts began to rise and have brought customer satisfaction to a 70% average for the month of July. Many lines were dropped as a result of the study, and some 150 lines have been shifted to the 426th Supply and Service Battelion (Ambl). A 100% inventory was conducted in the latter part of May and

27

AVDG-GC SUBJECT:

Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFCR-65 (R2) (U)

the first week in June, which created a work backlog. When processing started again, there were so many customer issues that several lines went to zero belance, and the percentage at zero belance started rising. The sud of this period finds total receipts rising again to replenish the exhausted stockage. The impact of the inventory was felt for a few weeks, however, and the end result was fewer warehouse demands. The beginning of the period sew 460 warehouse demands for the month of May, compared to 176 at the present time. Technical supply is presently carrying 5,118 lines which occupy approximately 90% of available storage space.

The battalion continued to provide contact teams for the line units and maintenance stand downs. The on-the-spot contact teams have continued to increase exteriel readiness and provide for more efficient combat units. A total of 511 technical assistance visits was conducted during the period. The country store listing was expended to reduce further the customer unit administrative requirements for submitting parts requests.

### g. (0) Civil Affairs.

- (1) Pacification and development activities in Thua Thien Province continued at an accelerated rate throughout the reporting period. The number of projects in progress at the beginning of the period was 136. During the period, 106 new projects were initiated, 102 projects were completed, and at the end of the period, 140 projects were in progress. All the division's afforts are closely coordinated with GVN officials at province and district levels. The overall affort of the division is directed toward the achievament of the astional objectives outlined in the Thua Thien Province Pacification and Development Plan, 1970. The Province Civic action Priority List, doveloped at the bamlet, village, and district levels and consolidated and approved at the próvince level, serves as the guideline in the selection of projects to be undartaken.
- (2) On 23 June, the final refuges resettlement payment was made, thereby eliminating all registered refuges from the rolls in Thua Thien Province. The resettlement payment, which consists of 10 sheets of tin and 7,500\$VN per family, normalizes a refugee camp, thus creating an official political entity. When conditions permit, the people of a normalized community have the option of returning to their original villages. When this is done, the returning families receive a roturn-to-village (RTV) payment, which also consists of 10 sheets of tin and 7,500\$VM per family. As of 30 June 1970, 63,129 of the 85,114 refugees generated during and after the Tet offensive of 1968 had been returned to their native villages. There remain approximately 22,000 people in 26 normalized camps and an additional 15,000 people scattered throughout the province, who are entitled to the return-to-village payments upon return to their ancastral homes. Continued division assistance in the program is taking the form of limited logistic and material support

AVDG-GC SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Alrmobile), Perlod Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

for related civic action projects. A total of 27 projects is planned, including 15 schools, three dispensaries, three markets, and six wells. For these projects, the province is supplying cement and roofing, RF and PF cadre provide the labor, and the division supplies lumber, reinforcing steel ters, and nails. The Phase I Program achieved 136% of the Return-to-Village Program's 1970 goal.

- (3) In December 1969, the division support command initiated a program to upgrade the Sector Maintenance and Direct Support Logistics Center (SMEDSLC) of Thus Thien Province. From its new location in Hus, the SMEDSLC will provide management, support, and services to all RF, PF, PSDF, and RD cadre and their equipment in the province. Fourteen major subprojects constitute the Division Support Command effort, with each subproject undertaken by the appropriate element of DISCOM. Of these, five have been completed, and six others are in progress.
- (4) During the period of this report, a total of 405 MEDCAPs was held, and 23,465 medical and dental patients were examined.
  - (5) Major projects completed during the reporting period:
  - (a) Phu Lot District.
  - 1 An Bong Hamlet school construction (ZD144005)
  - 2 Thus Law Hamlet dispensery (2D201012)
  - Wong Tri Hamlet school addition (20083008)
  - (h) Phu Veng District.
  - l Phu An Villege dispensory (YDS)2262)
  - 3 Flu Veng District dispensery repair (YD779277)
  - 3 " Phu Ten Village dike repair (YD816301)
  - (c) Phong Dien District.
  - Phong Dian Hamlet Farmers | Association Eldg repair (YD526348)
  - 2 Pho Trach Hamlet market place (YD503424)
  - 3 Ho Dien Hamlet school repair (YD615298)
  - 4 Phong An Village office (YD611291)
  - (d) Muong Dien District.
  - 1 Dien Loc Healet school repair (10595465)
  - 2 Ke Mou Hamlet school repeir (YD568464)
  - Yinh Yuong Healet school reprir (YD551473)

- (9) The initial lend reclamation and driver training effort in Phong Dien District was completed during the period. Two of the four Minneapolis-Moline tractors were displaced to Phu Vang District, one to Huong Thuy District, and one is presently being repaired. The program is now entirely a Vietnamese responsibility, to include the maintenance, repair and operation of equipment.
- (10) On 28 May, BG Smith, ADC(0), and COL Than, Province Chief, attended the dedication coremony of Phong An Village Headquarters in Phong Dien District. In a speech delivered by the Phong An Village chief, it was noted that 10 years ago Phong An was a scenic and prosperous area, with a well developed accnowy. In 1964, the village headquarters was destroyed in a wave of disruptive activities. In subsequent years the village headquarters was relocated twice and destroyed each time. Now, 100% of the local population has resettled to its original location, irrigation canals have been constructed, and three schools have been repaired through the pacification program since early 1969.

## CONFIDENT

AVDG-GC SOBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

In conclusion, the village chief pledged further development in security, economics, and education.

- h. (U) Paychological Operations.
- (1) Type and quantity of propaganda media employed:
- (a) Total leaflets disseminated:Air: 23,871,000 Ground: 59,100
- (b) Total loudspeaker broadcast hours: Air: 645:00 Oround: 1,041:30
- (c) Total movies shown: 123 Total hours: 333:45
- (d) Quick reaction leaflets: Four missions for 290,000 leaflets
- (e) Quick reaction broadcasts: Five missions for 17:00 hours
- (f) Hoi Chenh: Eight
- (2) The lat Inf Div (ARVN) and the 101st Abn Div (Ambl) cooperated in the development of leaflets and tapes for employment against the 66th NVA Regiment and other NVA units in the vicinity of PS/OB HENDERSON. The operation involved 15 hours of agrical broadcast and the distribution of 360,000 leaflets. One NVA soldier rellied during the reporting period.
- (3) On 29 May, an earlyword mission was conducted by the 9th Special Operations Squadron (SOS) in support of the 1st Rn (Ambl), 327th Inf. Severa minor SOI compatibility problems were encountered but have since been climinated. It is felt that this mission constituted a milestone in the division PSIOP effort, since this was the first time that an earlyword mission was conducted under the recently directed KXIV Corps PSIOP ground communication ayetem.
- (4) In an obvious effort to counter the strong psychological impact of the accelerated pacification and development program in Thua Thien Province, the energy increased terrorist activities in the populated lowlands during the latter part of May. VC incidents ranged from destruction of 1,000 mote: of hamlet fencing and distribution of VC propagands leaflets to the assaulination of the Phong District Chief. As yet, the full impact of thesisticates has not been determined. No appreciable change in the attitude of

AVDG-CC SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFCR-65 (R2) (U)

the people toward the GVN has been detected, and it is falt that the terrorist activities will serve only to alienate the people further from the NVE/VC.

- (5) During the middle of June, a photography team from the 4th PSIOF Group supported the division with photographic coverage of successful civic action projects throughout the province, taking approximately 400 slides which were later developed in Saigon. A allde show, code named "Operation Building Block", will be shown throughout the province by the audic-visual teams in cooperation with Vietnamese Information Service (VIS) cadra, in order to stimulate populace participation in civic action projects, thus explassing the overall nation-building affort.
- (6) Based on recent events and intelligence reports gathered on 20 June in the vicinity of the Vietnamese Selient, 100,000 quick reaction leaflets were printed by the 7th PSYOP Settation, for employment against the 6th NVA Regiment and dropped by the 9th SOS on 21 June, exploiting the discovery of a large energy hospital complex. In addition, the division ESYOP section conducted an aerial broadcast mission using tape recordings. Although concrete results could not be measured, it appears that quick reaction PSYOP missions of this nature have a detrimental effect on enemy morals due to the high credibility of the factual messages.
- (7) On 8 July, elements of the 2d Sqdn (Ambl), 17th Cav, on an armed serial recommaissince mission, in the vicinity of Khe Sanh, observed 150 to 200 NVA in the open. In response to an immediate PSYOP mission request from the squadron, the division provided PSYOP support to the operation. Suprement or Die leaflets and safe conduct passes were dropped, and an ARVN limitenant or Die leaflets and safe conduct passes were dropped, and an ARVN limitenant and serial broadcasts in response to the varied ground actions. Subsequent miretrikes and ground operations were exploited with let Inf Div (ARVN) PSYMAN broadcasts and quick reaction leaflets. Total NVA losses, after several days of operations, were very heavy. This action had a significant psychological impact on the NVA.
- (8) One EVA corporal reliied on 23 July in Nam Hos District. Utilizing the <u>Pallier's Guide</u>, 15,000 quick reaction leaflets were prepared and printed containing the rellier's name, rank, unit, and a statement concerning his excellent treatment by the GVW. Information obtained during interrogation was used to propers a tape which was recorded by the Hoi Chanh for broadcast. He was later exploited by the lat Brigade, which took him on an aerial reconnaissance over the area he had described during his interrogation to identify significant areas. Results of this effort were minimal as he could not associate the airborne view with familiar termain.
  - (9) A USAF mireraft flow a timely high altitude mission in support of

33

<sup>(3)</sup> Movement of the 32d Medical Deput from Phu Bal to Da Nang increased the order and shipping time of medical supplies from eight to 15 days. This delay necessitated initiation of weekly circuit supply missions by the battalion. Due to the increased distance, any emergency supplies must be delivered by helicopter.

<sup>(4)</sup> Company MEDCAF programs have continued, with medical compenies in support of brigade civil affairs programs. Each physician is scheduled for a minimum of one MEDCAP per week.

AVDG-GC SUBJECT:

Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Feriod Ending 31 July 1970, RCS CSFOR-65 (R2) (ii)

- (5) The air ambulance plateon continued to perform its mission of providing aero-medical evocustion support to the 101st Abn Div (Ambl). The majority of this support originated from CAMP RACLE. However, for most of the period two URIH air ambulances have been stationed at CAMP EVANS to provide quicker response to northern sections of the AO. During this reporting period, one of the battalion's authorized twelve aircraft was placed with division flight standards, leaving sleven functional aircraft with the plateon.
- (6) Mandatory training required by USARV Regulation 350-1 is being actively conducted and posted to individual training records. Emphasis has been placed on OJT and MOS cross-training to increase individual proficiency and to reduce the impact of DERCS lesses and temporary absences of personnel. The air ambalance plateon has taken meximum advantage of unfavorable weather during the period to improve individual aviator proficiency in instrument flight and inclement weather procedures.

#### j. (C) Signal.

- (1) The 501st Signal Battalion (Ambl) continued its mission to provide communications-electronics support for the 101st Abn Div (Ambl) throughout the reporting period. RATT teams continued to support the division, the three brigades, and DISCOM. In Operation BARBER GLADE, secure RATT was provided in support of Project Delta at Mai Loc. Both AM and FM RWI stations contimued in operation, and a jump capebility was provided at all times. The battalion responded to increased requests for 4-channel communications, linking brigades to battalion CFs at forward fire support bases, by installing AN/ORC163 equipment at FS/OB RAKKASAN, SHOCK, VECHEL, KATHRIN, BRICK, GLADIATOR, and MAUREEN. Four channel systems continued to be provided at Phm Loc District Headquarters, FS/OB BIRMINGHAM, FS/OB BASTOGNE, CAMP BAGLE, CAMP EVANS, RAGLE BEACH, and FS/OB RIPCORD. Four channel systems were also provided at Mai Loc for Project Delta, and at FS/OBs HENDERSON, HOLCOMB and SHEPHERD, CAMP CARROL and Dong Hs in support of combined US/ARVN operations. Four channel systems were provided at FS/OBs TON TAVERN and BARNETT in support of ARVN operations. Operational and maintenance responsibility of the 4-channel system linking FS/OB T-BONE to Hue utilizing AN/MRC68 equipment was transferred to the 1st Inf Div (ARVN). The battalion maintained an overall multi-channel reliability of 98.6% during the reporting period. This can be attributed to three factors: (a) the increased responsiveness of the ADAO in providing helicopter support to deliver equipment to fire support bases when equipment failures occurred;
- (b) the decrease in maintenance problems with the multiplexer AN/TCC70 of the AN/GRC163 due to femiliarity gained through its continued utilization; and
- (c) authorization of the battalion to obtain a temporary excess of AN/GRC163 equipment, which provided reliable backup reserves.

35

AVDG-GC

SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Roding 31 July 1970, RCS CSFOR-65 (R2) (U)

- (2) The battalion continued its policy of direct exchange of equipment that could not be immediately repaired. Division units were further assisted by signal contact teams sent to field locations for on-site repairs. There were 921 work orders completed during the reporting period. Receipt and issue of additional crypto equipment relieved some of the past shortages and provided additional flexibility.
- (3) The division's four MARS stations completed 13,843 phone patches during May, June and July. The division MARS stations set a USARV record with 5,253 calls during the month of May.
- (4) The 63d Signal Battalion continued to provide cable, 12-channel VMP, and microwave communications support to major subordinate and higher unit headquarters. During Operation CLINCH VALLEY in July, contingency circuits from CAMP CARROL to CAMP EVANS and CAMP EAGLE were activated in support of the 3d Brigade forward CP.
- (5) The battalion began a program of training selected personnel of the lat Inf Div (ARVN) signal battalion. To date, three officers and six onlisted man have received two weeks of CUT in the theory and operation of various equipment in the battalion. The ARVN personnel spent two weeks living and working with the 50lst Signal Battalion.

#### k. (U) Engineer.

- (1) During the reporting period, the 326th Engineer Battalien (Ambl) continued to provide general and direct support to the division. One new firebase was opened and several old firebases reopened. Upgrading of the Fhu Thu Estuary Road, the Jemme-Knight Road, and the Street Without Joy projects, was completed in support of tactical and civic action requirements. Project LIFESAVER was discontinued during the reporting period after the construction or improvement of 15 landing zones in the division AO.
- (2) During the last week of May, engineer support was consolidated and committed to establishing a forward line of hardened firebases in the division area of operation. The prependerance of engineer effort for the remainder of the reporting period was committed to this task. Initially four firebases were programmed for complete hardening. These hardening tasks committed A/326th Sagr to FS/OB ENICK, B/326 Engr to FS/OB KATHAYN, Companies B and D of the 27th Engr to harden FS/OB VECHEL and to complete construction of an access road to the firebase from Route 547, and Company D of the 14th Engr in to harden FS/OB RAKKASAN and to complete construction of an access road to the firebase from FS/OB JACK. FS/OB RIPCORD was designated to be hardened on a selective basis. During the last two weeks of the reporting period, two additional firebases were designated to be hardened. FS/OB GLADIATOR is to be completely hardened and FS/OB MAURSEN is to be hardened selectively.

AVDG-GG

SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (N2) (U)

- (3) During the summer season, with its sparse rainfall, heliped maintenance became a price engineer mission, with upgrading projects completed at FS/OB ARSENAL, TOWAHAVK, BASTOGME, KATHRYN, LOS BANGS and YEGHEL; at Phu Loc, Phu Thu, and Nam Hos district beadquarters; and at various base camp helipeds. Potable water was provided throughout the area of operation, with purification units located at FS/OB BASTOGME, FS/OB VECHEL, Hai Loc, the Thus Luu Bridge, and CAMP EAGLE.
- (4) At the beginning of the reporting period, a new firebase (FS/OB SHOCK), was created out of an existing landing zone. This firebase was constructed under the airmobile firebase concept of seven to 10 days occupation, and was closed after nine days of occupation. FS/OB KATHEYN, responded during the latter part of the previous reporting period, continued to receive engineer support in the form of demolition and earthmoving work. The existing hill mass was leveled so us to support two artillery batteries. The task of hardening FS/OB ERICK encompassed the construction of one 20'132', three 10'x24' and 41 8'x12' bunkers; installation of a tactical wire terrier; clearing of adequate fields of fire and preparation of logistic helicopter landing pads. During the bardening process, a system of prefehricating and airlifting bunkers to the job site was initiated with excellent results. The hardening process of FS/OB HEICK was completed by the end of the second month of the reporting period.
- (5) During the month of June two LZ cutting/bunker busting teams were inserted into western Quang Tri Province in support of the 2d Sqdn (Ambl), 17th Cav operations. One team was inserted into the FS/GB RCBIN area to cut an LZ to permit the extraction of medical supplies and documents from an NVA hospital site and to dostroy the remaining bunkers. The second team was inserted near FS/GB SNAPPER to cut an LZ to extract portions of a rice and weapons eache. This team was also used to destroy the remaining ordnence, rice, and bunkers.
- (6) At FS/OB VECHEL, a project was undertaken to provide adequate drainage facilities for structures on the firebase, to lay wire barriers, and to clear fields of fire. The hardening process on FS/OB VECHEL was completed by the 27th Engr Bn in late June. An additional requirement to establish a lat Brigade forward CP, consisting of one 10'x24' TOC and six 8'x12' sleeping position bunkers, was completed during the last week of the reporting period.
- (7) Maneuver elements occupying FS/08 RIFCCRD continued to receive engineer support throughout the entire reporting period. A refuel point for UNIH and LCH eigeraft was constructed, and bunkers were employed in selected positions around the firebese. Additional support included wire barriers, fields of fire, defensive positions, and adequate drainage facilities. During the latter stages of the reporting period, additional engineer support was committed to the firebase to counter increased enemy activity.

CONFIDENT

AVDG-GC SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFCR-65 (R2) (U)

- (a) Company B was tasked with improving the defendive posture of the firebase by contracting additional bankers, a quad-50 position, numerous revetments, a new log pad, and repair of damaged atructures and positions. A new position for a 105mm howitzer battery was built after a CH47 crashed and destroyed the existing battery, to include a massive ECD effort to deactivate and destory the damaged artillery amountion. Engineer elements were extracted with the closing of the firebase on 23 July.
- (b) In support of increased enemy activity around FS/OB RIPCORD, FS/OB GLADIATOR was reopened. One plateon of engineers was inserted on 19 July to harden the firebase. Tasks to be accomplished included constaction of 63 bunkers and two log pads, clearing fields of fire and installation of tactical wire. At present 39 bunkers have been completed.
  - 1. (C) Army Aviation.
  - (†) General.
- (a) Throughout the reporting period, the 101st Aviation Group (Combat) (Airmobile) provided aviation support to the division and non-divisional units in I Military Region. In addition to providing airlift and armed aerial ascort support, the group augmented the aeromedical capability of the medical battalion and provided air traffic and pathfinder support and limited battlefield surveillance and target acquisition.
- (b) Aviation requirements were met on a daily basis to provide the necessary support for combat operations, logistic resupply, and pacification and development efforts. Aviation support was also provided for Special Forces Project Delta; CCM missions; the lat Brigade, 5th Infantry Division (Mechanized); and the 1st Infantry Division (ARVM) in conjunction with the Victnesses Air Force.
- (c) Operation LIFESAVER and its program of landing zone expansion was concluded on 5 June 1970. During the reporting pariod, LIFESAVER teams completed 15 LZs, thereby increasing the total number of LZs created during Operation LIFESAVER to 170. All of these LZs are functional two ship LZs with high speed routes of approach and departure. During the reporting period, pathfinders controlled air traffic on as many as 14 fire support bases at one time.
  - (2) The following are statistical data for the reporting period:

UNIT	has floh	SORTIZS	PERSONNEL.	TONS CARGO	ACFT RECOV
lolst Avo Bo	18,173	61,850	66,377	2,039	6
158th Avn Bu	18,156	62,778	68,358	1,889	5

(3) The number of mircraft receiving ground fire increased by 98 over the last reporting period. The 101st Aviation Group experienced 187 incidents of ground fire reported as follows:

UHT H	AH1G	<u>0816A</u>	CH47	CH54
135	10	3	38	ī

- (4) The 101st Avn Gp (Cbt) (Ambl) conducted two airmobility classes for commanders and staff officers of the division during the reporting period. The first class (15-16 May) was attended by 39 personnel. The second airmobility class, conducted on 26-27 June, was attended by 31 personnel. Two pathfluder classes were conducted to train ARVN personnel. The first, from 4 May to 15 May, graduated one officer, two warrant officers, and 12 McOs. The second, from 25 May to 5 June, graduated one officer, two warrant officers and 11 McOs.
  - (5) Air traffic activities for the period were:

•	Eagle GCA	Engle Tower	liftmaster Tower
Kay	239 .	59,063	9,454
June	289	26,183	10,115
Jul <b>y</b>	246	28,451	12,000

(6) Throughout the period, the 101st Aviation Battalion (Assault Helicopter) (Ambl.) and the 158th Aviation Battalion (Assault Helicopter) (Ambl.) alternated their companies in providing direct combat and logistic support to the brigades of the division. The 159th Aviation Battalion (Assault Support Helicopter) (Ambl.) continued to provide general support to the division for the mir movement of artillery, combat troops, and supplies. Logistic support was also provided to the 1st Bie, 5th Inf Div (Mach); the 1st Inf Div (ARWN); and Project Delta. The 163d Aviation Company (GS) (Ambl.) continued to provide general support to the division, performing visual recommissiones, photography missions, courier service, psychological operations support, airborne personnel detector missions and commend and control. The company

AVDG-GC Subject:

Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (N2) (U)

provided air transportation for the division general staff. During the reporting period, the 530th Transportation Detachment (Aircraft Maintenance) (Ambl) was attached to the company and accomplished direct support maintenance on all company aircraft.

- m. (U) Air Cavalry Operations. The 2d Squadron (Airmobile), 17th Cavalry continued to perform extensive armed serial reconnaissance throughout northern I Military Region in support of Allied operations. The squadron engaged in combat as an economy of force unit, provided immediate reaction forces for enemy contact and security of downed sircraft and surveillance and security operations for the division and subordinate combat elements.
- (1) The 2d Squm (Ambl), 17th Cav is one of the primary intelligence gathering agencies of the 101st Abm Div (Ambl). With three air cavalry troops, a ground troop and Company L (Ranger), 75th Infantry attached, the squadron performs extensive air and ground recommaissance and surveillance. In the collection, avaluation, and dessemination of intelligence information, the squadron works closely with US and ARVN intelligence agencies. Close coordination is maintained with the division order of battle, imagery interpretation, ground sorveillance and G-2 air sections and division INV teams. Valuable intelligence is gained through cooperation and informal coordination with the let Inf Div (ARVN) and the let Bie, 5th Inf Div (Mach). Based on intelligence indicators, the squadron's combat elements are targeted against specific areas of interest in order to provide the companding general with a clear assessment of the situation in all reaches of the division area of operation.
- (2) The most significant findings attributed to armed aerial reconsistance by the 2d Sqdn (Ambl), 17th Cav during the reporting period were in June, when an extensive rear service area of the 66th NVA Regt was discovered in the FS/OB leatherneck area, and in July, when air cavalry elements discovered the 9th NVA Regt, 304th NVA Division, infiltrating into SVN.
- (3) Extensive employment of the 2d Sodn (Ambl), 17th Cav throughout the division AO, with particular emphasis on the division reconnaissance zone, resulted in 2,125 spot reports of enemy activity, eight crew served and 41 individual weapons captured, 396 enemy killed and five prisoners captured.

#### n. (U) Artillery.

(1) The 101st Airborne Division Artillery (Airmobile) provided close and continuous fire support to meneuver units throughout the reporting period. Light howitzer battalions continued to provide direct support to the infantry brigades, with the 2d En (Ambl), 319th Arty (105) in direct support of the 3d Brigade; the 2d En (Ambl), 320th Arty (105) in direct support of the 1st Brigade; and the 1st En (Ambl), 321st Arty (105) in direct support of the 2d Brigade.

AVDG~GC

SHEJECT: Operational Report - Lessons Learned, 101st Airboure Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

Battery D, 2d Bn (Ambl), 320th Arty (105) remained attached to the 3d Bo (Ambi), 506th Infantry in II Military Region.

The 21 Bm (Ambl), 11th Arty (155), the 4th Bm (Aerial Arty), 77th Arty, and A Btry (Ava), 377th Arty remained in general support of the division.

The following 108th Artillery Group units were located in the division ages of operations in a general support role: Btry A, 24 Bm (8"/175) (SP), 94th Arty at C1; Btry A, 1st Bn (8"/155) (SP), 39th Arty at FS/OB RAKKASAN; Btry B, 1st Bn (8"/175) (SP), 39th Arty at FS/OB BAHBARA; Btry C, 1st Bn (8"/155) (SP), 39th Arty at Camp Evans; Btry A, 1st Bn (82/175) (SP), 83d Arty at FS/OB BASTOCKE; Btry B, 1st Bn (82/175) (SP), 83d Arty at FS/OB BIRMANCHAM; and Btry C, 1st Bn (8"/175) (SP), 83d Arty at FS/OB BIRMANCHAM; and Btry C, 1st Bn (8"/175) (SP), 83d Arty at FS/OB VEGEL.

Btry B, 2d Bn (6"/175) (SP), 94th Arty of the 108th Artillery Group was located at CAMP CARROL in Northern I Military Region and provided fires in general support of the division.

Bury B (M42), 1st Bm, 49th arty and a section of Bury C (M55), 65th Arty of XXIV Corps Artillery were deployed in the division AO to provide fires for base and bridge security.

- (2) Artillery fires were employed throughout the division area of operation to discupt enemy lines of communication and infiltration router. This was accomplished through artillery raids and fires in reaction to sensor activations, radar detections, serial survoillance, and intelligence. Extensive extillery fires were employed nightly in the "rocket helt" areas on the periphery of the populated lowlands and in the area edjacent to military installations.
- (3) Throughout the reporting period, US and ARVN artillery units contimed to employ coordinated fires in support of combined operations. The division artillery serial surveillance program continued to locate and adjust fires on enemy forces and to provide observation for artillery registrations.
- (4) During the period of heavy enemy contact in the vicinity of FS/CB RIPCORD in July, Stry B, 2d Bm (Ambl), 319th Arty suffered beavy damage when a CH47 aircraft oracled and burned in the 105mm amountion storage area, causing a major fire on the firebase. All six to sum howitzers of the battery were destroyed.
  - (5) Repositioning of Artillery Support:

- o. (U) Information.
- (1) Public Information.
- (a) Number of hometown news releases: 4,935.
- (b) Number of news/feature stories released to public and military madia: 175.
  - (c) Number of photographs released: 129.
- (a) Rumber of correspondents provided support by the information office: 91.
- (e) Coverage was also provided for 50 distinguished visitors to the division, including Representative William C. Cowgar (R-Ky) and General William C. Westworeland, CSA.
  - (2) Cormand Information.
- (a) During the reporting eriod, six issues of the division newspaper, "The Screaming Eagle", and the spring issue of the division magazine, "Rendezvous with Destiny", were published.
- (b) In support of President Nixon's proclamation of the period 24-30 May as Drug Abuse Prevention Week, the information office instituted the following:
- 1 A half-hour discussion program on drug abuse was broadcast over AFVN-TY Quang Tri at 1530 hours 30 May. The program featured one medical officer, one legal officer, and a moderator from the division.
- 2 A 50 second radio "spot" amouncement concerning drug abase and the division amounty program was breadonst daily over ANN-R, Quang Rri.
- 3 The "Airborne Dateline" foatured drug abuse and the division amounts program each day in the cartoon and special announcement section.

ATDG-GO

SUBJECT: Operational Report - Lensons Lourned, Most Airborne Divinion (Airmobile), Period Ending 31 July 1970, RC: CHROR-65 (R2) (II)

 $\underline{A}$  A flier on drug abuse prevention was attached to the daily bulletin for distribution and posting.

5 USART Bast Short 26-70, "Drug Abuse in the Military", was reproduced and distributed with a cover letter requiring the topic to be covered during June at all unit commanderet calls.

AVDG-GC SUBJECT:

Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Feriod Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

- 2. Leagung Learned: Commander's Observations, Evaluations and Recommenda-
  - A. (U) Personnel. None.
  - b. (C) Intelligence.
  - (1) Use and update of intelligence data base information.
- (a) Observation: A data base of intelligence information on the location of energy bunker complexes, cache sites, trails, and other information gathered during combat operations and maintained at maneuver hattalion level, provides valuable information for units conducting patrol, surveillance, and reconnaissance operations.
- (b) Evaluation: Experience has shown that when small unit commanders and patrol leaders are thoroughly briefed on previous enemy positions and activities in their area of operation, from information provided by an accurate and current intelligence data base, the information gathered by the unit and returned to intelligence personnel is much more detailed and valuable. The data base can be kept current and will provide indications of enemy trends and activities in the area. The exchange of this type of information with adjacent units or units moving into the area for the first time, increases the overall effectiveness of operations.
- (c) Recommendation: That unit intelligence personnel (S2) be encouraged to aggressively pursue a program of detailed intelligence gathering, collecting a data base, disseminating the data, and updating the data base from detailed debriefings.
  - (2) Acoustic sensors in support of ranger teams.
- (a) Observation: Acoustic sensors can be effectively used to extend the surveillance capability of ranger teams for short periods of time.
- (b) Evaluation: Following the insertion of Hanger Team "Cirade" on 18 April 70, six accustic sensors were air delivered by personnel of the ground surveillance section, supported by the 2d Sqdn (Ambl), 17th Cav. The primary mission of the ranger team was to monitor sensor activity and respond with artillery fire. During the seven days the team monitored the accustic sensors, it heard metallic sounds, voices, and screaming, when artillery was employed. Conversations heard and translated by a Kit Carson Scout revealed MVA/VC plans to ambush a US unit in the area. The plan was later abandoned due to non-evallability of automatic weapons. NVA/VC were also heard monitoring US radio transmissions and discussing the disposition of US forces in the area.

avdg-cc

SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airwobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

- (c) Recommendation: That commanders consider the use of accustic sensors with ranger teems for target acquisition and intelligence collection.
  - e. (C) Operations.
  - (1) Territorial force operations in the jungle canopy.
- (a) Observation: During the last reporting portiod, a program of combined operations with Regional Force elements, operating in the canopy for short periods of time, was begun. Continued combined operations during this reporting period have culminated in independent RF company operations deep in the empty for periods of up to 15 days.
- (b) Evaluation: The RF companies continue to show progress in proficiency and aggressiveness. Continued operations, farther from the populated areas, increase the responsibility and sense of urgency of the FF and PEDF forces securing the populated lowlands.
- (c) Recommendation: That continued coordination be maintained with GVN officials to encourage increased RF operations, in the canopy.
  - (2) Sniper team employment.
- (a) Observation: A five man sniper team, employed with the PFS-5 radar, has shown to be a very effective method of interdicting enemy infiltration in the populated lowlends of Thua Thien Province. The effective employment of snipers is generally limited to open, relatively level terrain of the lowlends.
- (b) Eveluation: Upon initial employment of the radar/sniper teams into known infiltration areas, movement was frequently detected and engaged. Infiltration through these areas was greatly diminished, and indications were that the routes were effectively interdicted.
- (c) Recommendation: That units be made aware of this technique of interdiction.
  - (3) Mechanical ambushes.
- (a) Observation: The extensive employment of mechanical ambushes during the reporting period has led units in the field to recommend the use of monofilament fish line as trip wire, used PRC25 batteries as the power source, and clothesplus for the trigger device.
- (b) Evaluation: The monofilement fish line has been procured locally or through individual purchase and is much proferred over trip wire. Used

46

AVDG-GC SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

PRC25 batteries are readily available and durable in all weather conditions. The clothespin firing device is sensitive and quickly employed in the field.

- (c) Recommendation: That units employing mechanical ambushes consider this technique of employment.
  - (A) Frafabricated firebase facilities.
- (a) Observation: In conjunction with the division-wide program of hardening fire support bases against energy attack, facilities such as bunkers, latrines, showers and other structures were prefabricated or constructed in rear base areas, and airlifted to the firebase.
- (b) Evaluation: This procedure reduced time, effort, and sircraft blade time required for establishing and hardening a firebase. All tools and labor were readily available in rest steers, and no excess material was delivered to the firebase requiring backhaul or destruction.
- (c) Recommendation: That units establishing forward fire support bases consider the construction or prefabrication of facilities in rear eress, prior to delivery to the firebase.
  - (5) Local patrolling around forward firebases.
- (a) Observation: Buring the present division operation (TEXAS STAR), an active patrolling program around forward fire support bases has severaly limited the energy's reconnaissance capability and delayed, and some times prohibited, his attack on the fire support base.
- (b) Evaluation: Local patrolling around the fire support bases, from 1000 to 1500 maters out, allows the firebase defenders to employ all defensive fires and enables the patrols to locate propositioned enemy indirect fire weapons and eachs sites. An enemy ground attack against FS/OB RIFCORD was very likely pre-empted on 22 July, when Co A, 2d Bn (Ambl), 506th Inf was engaged by an estimated two company enemy force approximately 1000 meters southeast of the firebase.
- (c) Recommendation: That units consider an active patrolling program around forward fire support bases.
  - (6) Use of E-158 CS conisters.
- (a) Observation: Aircraft are extremely vulnerable to small erms and mortar fire while entering and leaving a landing zone during combat assaults, extractions, or resupply.

47

AVDG-GC SUBJECT: One

Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RGS CSFOR-65 (R2) (U)

- (b) Evaluation: Tactical CS has proven to be effective in limiting the enemy's ability of placing aimed fires into an LZ during these missions. In addition, experience has shown that it requires approximately 15-20 minutes for the enemy to place the first mortar round on an LZ. Employment of tectical CS on suspected mortar and forward observer positions, shortly after the initial insertion of troops, can assist in preventing effective mortar fire in or around the landing zone.
- (c) Recommendation: That units conducting airmobile combat and resupply operations consider the use of tactical CS in restricting the enemy's indirect fire capability.
  - (7) Tactical CS against a fortified position.
- (a) Observation: The energy's limited protective capability against rict control agent CS makes its useagainst entrenched and fortified positions very effective.
- (b) Evaluation: Employment of tactical GS has caused the enemy to withdraw from his fortifications, thus increasing his vulnerability to other supporting fires. Employment of E158s against suspected enemy locations has also proved to be an effective means of recommaissance by fire.
- (c) Recommendation: That units consider the use of tectical CS agent against hardened targets.
  - (8) Quadrant system of control during sizmobile assaults.
- (a) Observation: The use of a standard quadrant system to divide the area around landing zones during combat assaults provides for botter sir traffic control and allows for continuous suppression around the landing zone.
- (b) Evaluation: It has been found that a system, consisting of the four major quadrants, NE, SE, SW and NM, numbered one through four, respectively, is an excellent tool in planning for suppressive fires during combat assaults. Three quadrants are allocated a type of suppressive fire while the fourth is utilized for entrance and exit of the lift aircraft. The suppressive fires as well as airborne on call assets, i. e., tactical CS, crew recovery aircraft, and C&C sircraft, can be repositioned rapidly to meet a changing situation.
- (c) Recommendation: That the system be considered for evaluation and possible inclusion as simpobile dectrine by other units conducting airmobile combat assaults.

AVDG\_GC SUBJECT:

Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS C3FCR-65 (R2) (U)

- (9) Helicopter ground-to-air incidents during EDA.
- (a) Observation: During conduct of tomb damage accessment of B52 strikes, circraft have frequently received small arms and automatic weapons fire and observed enemy activity in the strike zone.
- (b) Evaluation: The frequency of these incidents indicates that the enemy expects a helicopter recommissence after a B52 strike and that the enemy surviving in the strike zone quickly recover to engage US aircraft. Successful countermeasures used by the division have been to employ an air cavelry teem, consisting of a C&C aircraft, two AHC Cobrac and a LOH, immediately after the strike. The employment of tectical CS (EC158 canisters), from the C&C mircraft, on suspected enemy locations, has reduced the effectiveness of the enemy fire.
- (c) Recommendation: That commenders consider this technique during the conduct of bomb damage assessment.
- (10) Detailed studies have recently been concluded within the division in an effort to minimize friedally ensualties and maximize the combet effectiveness of maneuver units. A study of the period 7 December 1969 through 9 July 1970 indicated that the majority of US resulties during the period were inflicted by enemy attacks on night defensive positions (MDP). The following lessons, some of them re-learned, have been emphasized in the division.
- (a) Preventing the enemy from knowing the location and size of night defensive positions and denying him samy access into the area is extremely important. The area selected for an MDP should be located in rough terrain with thick underbrush whenever possible. This will make it difficult for the enemy to move up to the position without being detected, and the thick underbrush will often prematurely detenate APC rounds fixed towards the position.
- (b) Movement into the NDP should be conducted about 15 minutes prior to full darkness, permitting personnel to establish their individual positions and begin setting up their trip flares, claymores, warning devices, and mechanical ambushes while they still have enough light to work sefely. At this time, it is dark enough to prevent the energy from observing those actions from a distance of more than 100 meters away.
- (c) When metablishing individual positions, personnel should avoid digging in next to trees or tree stumps. The enemy will fire his RPGs against trees and into heavy brush areas to create air bursts in order to apray the

AVDG-GC SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFCR-65 (R2) (U)

area with shrephel.

- (d) An MDF should not be established on the side of a hill unless the top of the hill is reconncitered and out posted. In a recent operation, a unit went into position on a small knoll below the top of a hill. The hill had been recently occupied by the NVA, and bunkers and cleared fields of fire had been established. When the NVA began an attack from this position, they had the adventage of cover, clear fields of fire, and dominant terrain.
- (e) Mechanical antushes and trip flores should be emplaced from 100 to 150 meters away from the individual positions of the NDP. When machanical ambushes are tripped at this distance, early warning is provided and the NDP's location is not compromised. By employing the mechanical ambushes this far out, friendly movement near the NDP perimeter is not significantly restricted.
- (f) At least two trip flares should be employed on the friendly side of the amoust. Friendly forces approaching the mechanical amoust from the NDP will be warned by tripping the flare. The flares will also provide an extra mesns of warning should the enemy succeed in bypassing the ambush.
- (g) After the recovery of early warning devices and mechanical ambushes, squed patrols should be sent out on all sides of the MDP prior to the movement of the main body. The MVA will occupy positions as close as 20 meters from the MDP, apparently in order to provide themselves a sleeping position protected from friendly ARA, artillery, and morter fires, and a position from which to reconnciter the MDP. The squad patrols will seek out these positions and spoil any attempt by the enemy to ambush the unit.
  - (11) Amounttion allocation forecast.
- (a) Observation: The division is required to submit a monthly forecast of expected assumition expenditures for one month in advance. There are nearly 50 different types of assumition which require forecasting and six different mathematical computations are required for each type.
- (b) Evaluation: Because of the myriad of mathematical computations involved in the ammunition forecast it was considered an ideal type of program for the UNIVAC 1005 computer located at the division personnel center. The G3 section coordinated directly with personnel services branch to develop a computer program which would virtually eliminate the menual mathematical work on the forecast and reduce the chance of error considerably. The time required for completion of the report was reduced to approximately one day, resulting in an overall saving of 36 man hours of work. Further, the computer was able to print out the information and computations re-

avdg-gc

SUBJECT: Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

quired in a useable format.

- (c) Recommendation: That units consider using the Inherent capabilities of the UNIVAC 1005 computer to forecast ammunition requirements.
  - d. (U) Organization, None.
  - e. (U) Training. None.
  - f. (D) Logistics. None.
  - g. (C) Communications; Field expedient autenna.
- (a) Observation: Communications in the canopy between companies in the field and the battelion FOC are often difficult.
- (b) Units in the 3d Bde have successfully improved radio communications by using a field expedient entenna constructed from communications wire (WDI). At Tab 1 is a diagram of the field expedient antenna.
- (c) Recommendation: That units consider the use of this simple, field expedient antenna to improve radio communication in the field.
  - h. (U) Materiel. None.
  - 1. (C) Other.
  - (1) Civic action assistance by RD cadre.
- (a) Observation: The success of civic action projects will invariably depend upon the leadership of the local Vietnamese officials. Although the majority of elected officials is very capable, there will always be some who are relatively ineffective. NO cadre are generally well trained, strong leaders, knowledgeable in civic action activities.
- (b) Evaluation: RD cadre can provide valuable advice in the coordination of civic action projects and may be able to encourage completion of clow-moving projects.
- (c) Recommendation: That personnel involved in civic action employ the assistance that can be provided by local RD cadre.
  - (2) NVA Sapper Attack Against FSB Tomahsuk. See Inclosure 5.
- 3. Department of the Army Survey Information. None.

51

Inclosure 1 (Operations Marrative) to Operational Report - Lessons Learned, lolst Airborns Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

- (1) 29 April 5 May 1970.
- (a) On 50 april, the division commerced operations with the 54th ARVN Regiment in the area south of FS/OB HENDERSON. The lat Bn, 54th ARVN Regiment in the area south of FS/OB HENDERSON. The lat Bn, 54th ARVN Regiment in the AC south of the FS/OB on 30 April followed by the 2d Bn which assaulted to FS/OB TON TAVERW on 1 May. Both hattalions conducted operations in coordination with the 3d Brigade. On 30 April, Co D, lat Bn (Ambl), 50lst Inf assaulted to FS/OB HENDERSON and provided security for the insertion of Btry B(-), 2d Bn (Ambl), 11th Arry and Btry B, 12th Arry (ARVN). The company passed to the operational control of the 3d Bde.

Also on 30 April, the let Bn (Ambl), Solst Inf terminated operations south of CAMP EVANS and moved by air to FS/CB KATHRYN to commance recommaissance in force operations to locate and destroy energy anti-aircraft weapons and base camps in the area. The battalion (-) passed to the operational control of the 1st Edo. The 1st Bn (Ambl), 506th Inf passed CPCON to the 1st Edo at 1600 hours and continued operations scuthwest of FS/OB BULLET. Four US and one ARYN battalion were now conducting operations against elements of the 29th SVA Regt in the mountains, vicinity the SONG BO River.

The 2d Bde continued to provide support for pacification and devalopment programs in the lowland areas and assured responsibility for the piedmont area of PHONG DIEN District south of CAPP EVANS. Mobile training teams continued to improve the combat proficiency of RF and FF units and to teach PEDF fundamentals of defence.

The 3d Bde continued recommissance in force operations with two US battalions in operational coordination with the let, 2d and 4th En, let ARVN Regt south of FS/OB RIFCORD and PATTON. On 1 May, the 2d Bn, 54th ARVN Regt moved by air to LA VANC. The 3d Bn(-) moved by air to FS/OB O'REILLY to provide security for the firebase and to conduct patrol and ambush operations northwest of FS/OB RIFCORD. On 5 May, Co I, let Bn. (Ambl), 50let Inf was nelleved at FS/OB RENDERSON by Co A and the Reconfigure. DOO them moved by air from the firebase and returned to control of the parent unit at FS/OB BASTOCKE. Co A, 2d Bn (Ambl), 50let Inf, with the Reconnaissance Platoon, moved by air to FS/OB ESEDERSON to provide security for the FS/OB.

(b) Significant Activities. At 291400, vicinity YD505077, the 2d Plt, Co B, 2d Bn (Ambl), 502d Inf received mortar and heavy small arms fire from an enemy force located in bunkers at a distance of 10 meters. The platoon employed organic weapons, tube artillery and ARA and was reinforced by the remainder of the company, Company C and the recommissance platoon. As the US elements maneuvered against the enemy force, supported by air strikes, ARA and tube artillery, the enemy fled to a second banker complex at 1515 hours. At 1549 hours the enemy fled to a third banker complex. The contact

Inclosure 1

CONFIDE TO Downgraded at 3 year intervals;
Declassified after 12 years.

Inclosure 1 (Operations Marrative) to Operational Report - Leasons Learned, 101st Airborns Division (Airmobils), Period Ending 31 July 1970, RCS CSFOR -65 (R2) (U)

terminated at dusk. A sweep revealed 15 MVA KIA, two RFG launchers, one AK-47, one N-60 machinegum, one N-79 granade launcher and one PRC 25 radio. set. Twenty-six WS were wounded in the action.

At 292140, vicinity YD438190 (FS/OR CRANTE), Co A, 2d Bn (Ambl), 501st Inf received an enemy ground attack supported by mortar and RPG fire. With flareships, USAF AC-119 "stinger" aircraft, ARA and tube artillery supporting the company, the enemy was repulsed and a first light sweep revealed 18 RVA KTA and one FW captured. The company suffered seven killed, seven wounded, and one missing in action.

On 30 April, FS/OB CHARITY received five separate morter attacks resulting in 34 US WIA. ARA and tube artillary were employed on suspected enemy positions as air cavalry elements and ground forces searched for enemy mortar positions.

On 1 May, enemy indirect fire attacks continued on FS/OB CHANITE and GIADIATCR. A total of eleven attacks were directed at the fire bases as US ground units sided by counter-mortar radar and serial reconstitutes aircfaft continued to scarch for enemy mortar positions.

On 2 May, sixty-four 55 gallon drums of mapalm were dropped in the vicinity of FE/OB HENDERSON to improve fields of fire. The 2d Bn, 54th ARVN Regt made heavy contact scuth of the firebase resulting in 18 enemy KTA. Eveny mortar attacks continued against FE/OB GRANFE. Air strikes against enemy mortar positions resulted in three EVA KIA, three secondary fires, four bunkers destroyed and one secondary explosion.

The search for energy mortar positions in the vicinity FS/OB RIPCORD and CRANITE continued on 3 May, with heavy artillery support from FS/OB JACK. At 030330, CRMP BIGLS received seventeen 122mm rockets causing light damage to aircraft and ammunition supply points. Eleven US were wounded in the attack.

At 031130, vicinity YD511065 the lat Flt, Co C, 2d Bn (Ambl), 502d Inf, while conducting patrol activities, received RPG and small arms fire from an enemy force at 40 meters. The element returned organic weapons fire and employed ARA, tube artillery and air strikes on the enemy positions. A sweep of the contact area rewealed 27 NVA KIA. US casualties were one KIA and 13 WIA.

On 4 and 5 May, a heavy artillery battery again moved to vicinity FS/OB JACK and was employed against suspected enemy forter positions in the canopy vicinity FS/OB GRANIES. The battery returned to CAMP EVANS each night.

On 5 May, contacts by units of the lat Bde, south of the THREE FORKS area of the SONG BO River resulted in 18 MVA KIA. US canualtion were

-2 CONFIDENTIAL

Inclosure 1 (Operations Narrative) to Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 51 July 1970, RCS CSEOR-65 (R2) (U)

cix KTA and 26 WIA.

At 051000, vicinity Y044364 (4 KK NW of F5/08 FUN TAVERN) the let be, 54th ARVN Regt engaged an estimated two enemy platoons in bunkers 50 meters from their position. The enemy returned small arms fire and withdrew. ARA was employed and a sweep revealed 28 NVA KIA. ARVN casualties were five KIA and 26 WIA.

- (2) 6 12 May 1970.
- (a) On 6 May, the 4th Bn 54th ARVN Regt ascaulted into an LZ northwest of FE/OB TON TAVERN (vicinity FE/OB MINK) and joined the let and 2d Bn, 54th ARVN Regt conduction operations against elements of the 66th MVA Regt in the area. On 7 May, the 2d Bn, 54th ARVN Regt was extracted and moved by air to CAMP CARROL and then by vehicle to DONG MA.

In reaction to heavy enemy activity in the FS/OB MEMDERSON area on 6 May, Co B, 3d Bn (Ambl), 187th Inf and Co D, 1st Bn (Ambl), 501st Inf passed to the operational control of the 2d Bn (Ambl), 501st Inf and assaulted into the area north of FS/OB MEMDERSON on 7 May to locate enemy units. A 3d Bds control element directed operations from the firebase. Companies C and D, 2d Bn (Ambl), 501st Inf passed to the operational control of the 2d Bn (Ambl), 506th Inf and continued operations south of FS/OB RIPCORD.

Co C. 3d Bn (Ambl), 187th Inf and Co D. 1st En (Ambl), 501st Inf returned to parent unit control on 8 May and the 3d Dde terminated operations in the FS.OB HENDERSON area as the 2d Bn (Ambl), 501st Inf returned to CAMP EVANS. The 2d Bn, 2d ARME Regt passed OPCON to the 54th ARVE Best to provide security for FS/OB HENDERSON.

On 9 May, the 2d Rn(-) (ambl), 501st Inf redeployed in the division AC vicinity FS/OB CLADIATCR and CRANITE with Co C and D returning to battalion control. Co A remained at CAMP EVANS to sugment security and resigning.

On 10 May, the lat Bm. lat ARVN Regt terminated operations with the 3d Bde vicinity FS/OB RIPCORD and moved to IA VANG to provide security in the area. The 3d Bde continued operations with two US and one ARVN battalion in the mountains south of FS/OB RIPCORD and PATTON.

Also on 10 May, the division assumed OPCON of Detachment B-52, 5th Special Forces Group (A). Two companies and elements of the headquarters moved by air from NHA TRANG to CMANG TRI and then by vehicle to MAI LOC. The detachment began preparations for insertion of reconnaissance teams into the division AO on 15 May.

On 11 May, the 3d Bn, 54th ARWN Regt terminated operations with the 1st Bde vicinity the SONG BO River and moved by air to FS/CB ARZIO.

On 12 May, the 2d Bn (Ambl), 50lst Inf moved to BRU RAI COMMAT BASE to conduct battalion refresher training and returned to operational control of the 2d Bdc. The lat Bn (Ambl), 506th Infractional to SPCOM of the 3d Bdc and continued operations against elements of the 5d No. 174 May of the 1-3

Inclosure 1 (Operations Narrative) to Operational Report - Leasons Lammad, 101st Airborns Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

3d Bn, 3d ARVN Root moved by air to FS/OB KATHRYN to propers for assault of elements of the battalion into area south of the firebase on 15 key in OPCOCKD with the lat Bde.

Throughout the period 6 - 11 May, A Btry (8-in), let Bn 59th Arty continued daily moves from CAMP EVANS to the area south of FS/OB JACK to deliver heavy artillory on suspected enemy mortar locations in the vicinity of FS/OB GLADIATOR and GRANIMS. The battery returned to CAMP EVANS each night.

(b) Significant Activities. At 060505, FS/OB HENDERSON received RPG, small arms fire, satchel charges, recoilless rifls and mortar fire followed by a will organized and coordinated ground attack by the 6th Bm, 66th NVA Rogt. Fires, started when the NVA employed flame throwers against the fire base, caused approximately 1000 rounds of 155mm artillery amountation to explode. Defending forces supported by ARA, tube artillery and guaships accounted for 29 NVA killed. The enemy withdrew at 0700. Co B, 21 Bm (Asbl), 501st Inf moved by air to reinforce Go A, 21 Bm (Asbl), 501st Inf, and to conduct a daylight sweep. Friendly elements received incoming mortar fire spondically throughout the day, Artillery, ARA, gunships, and air strikes were employed against enemy mortar positions. The 24 Bm, 24 ARVN Regt assaulted south of FS/OB HENDERSON to locate and destroy the remainder of the enemy force. A number of friendly casualties were caused by the exploding 155mm artillery amountains. Thirty-two US were killed in action, 33 wounded, and two missing in action. ARVN casualties were 19 KIA and 45 WIA.

On 7 May, FS/OB MENDERSON continued to receive sporadic mortar and recoilless fire throughout the day, resulting in four US and three ARVN WIA.

At 070450, YD429122, (FS/OB MADREEN) the 2d Plt, Co D, let Bn (Ambl),
506th Inf received 60mm mortar fire, small arms and satchel charges from an
estimated enemy company. The plateon returned fire while a flareship and
ARA were employed. Elements of the company moving to reinforce the plateon
received small arms fire from an enemy force at 20 meters. The element returned small arms fire and the enemy fled. ARA, gunships and air strikes
were employed on suspected enemy locations at 0700. 60mm mortar fire was
received by the company at 0800 and again at 1500. Six US were killed in
action and 12 wounded. A sweep revealed four NYA KIA.

On 7 and 8 May, the lat Bn, 54th ARVE Regt continued to engage enemy forces in the FS/OB TOK TAVERE area accounting for 36 MVA RIA. At 080900, vicinity YM043360, the battalion discovered 30 graves containing 97 enemy bodies apparently killed by AF air strikes during the previous week.

At 091030, vicinity YD495954, Co A, 2d Bn (Ambl), 502d Inf received smell arms and RPC fire and fragmentation grenades from an estimated 12 - 15 enemy in bunkers. The company roturned fire and withdrew as artillery, ARA, gunships, and air strikes were employed. A sweep of the area revealed 18 NVA KIA. US casualties were one KIA and 12 WIA.

The period 10 - 12 May was marked by light contact in the division AO. Highteen enemy were killed by small arms ARA halo artillar annualine, and air strikes.

#### COMPLETIA

Inclosure 1 (Operations Narrative) to Operational Report - Lessons Learned 101st Airborne Division (Airbobile), Period Enling 31 July 1970, RCS CSRUR-65 (R2) (U)

- (3) 13 = 20 May 1970
- (a) On 15 May, the 3d Ma, 3d Regt (ARVN) moved by air from CAMP SALLY to FS/OB VECHEL to join the let Bde conducting offensive operations against elements of the 29th NVA Regt in the mountains southwest of HME. The three ARVN companies combat assembled from FS/OB VECHEL with Companies A and B, let Bn (Ambl), 501st Inf, into two landing zones south of the RAV LA River. The ARVN companies conducted patrols to the south and the two US companies conducted patrols north toward the giver.

Inclowent weather postponed the planned insertion of reconnaissance teams of Det B52, 5th SEG (A) on 15 May. Two teams were inserted into the Vietnamese Salient vicinity XD922283 and XD881240 on 16 May.

On 18 May, in response to intelligence indicating a possible enemy attack against PNU HAI Combat Base and the DONG HA Training Center in celebration of the birthday of HO CHI MURH, Companies B and C, 2d Bn (Ambl), 501st Inf passed to the operational control of PHU RAI Base Defense. Co A passed OPCON to the 1st Bn (Ambl), 502d Inf to agreen south of PHU RAI. The division observed a cease fire and all offensive operations terminated with units assuming a defensive posture from 181200 to 191200 May.

On 19 May, the 4th Bm, let Regt (AHVN) extracted from the 3d Bde 40 and moved by air to LA VANG to refit and provide security in the area, leaving the 2d and 3d battalions conducting operations in coordination with the 3d Bde south of FS/OB RIPCORD.

Also on 19 May, the 2d Em (Ambl), 501st Inf completed battalion refrasher training and prepared for redeployment into the division AG. Company C assaulted from PhD BAI Combat Base to FS/OB BRICK and prepared to receive artillery. On 20 May, the remainder of the battalion moved by sir to FS/OB BRICK to commence search operations in the TA TRACH River Vally, and passed to the operational control of the 1st Ede.

On 20 May, the planned extraction of the lat En (Ambl), 50lat inf from vicinity FS/OB KATHRYN to PHU HAI Combat Base to conduct battalion refresher training was postponed due to inclement weather.

The 2d Hde continued to operate in the piedmont and to deploy Mobile Training Teams to increase the capabilities of teritorial forces.

(b) Significant Activities. At 160428, violativy YD487065, Co A, 2d Bn (Ambl), 502d Inf received RPG fire from an enemy location north of their night defensive position. Seven minutes later the company received RPG, automatic weapons and small arms fire from the enemy east and west of the position. The company returned organic weapons and tube artillery fire. A USAF flareship was employed to provide illumination. At 0521 hours the Recon Plt engaged enemy movement at YD490068. A first light sweep of both contact areas by the Recon Plt revealed five KVA KIA, two AK-47s and one RPG launcher captured. US losses were four KIA and 22 mentions of a seven contact areas and such contact areas by the Recon Plt revealed five KVA KIA, two AK-47s and one RPG launcher captured.

1-5

Inclosure 1 (Operations Marrative) to Operational Report - Lessons Learned, 101st Airborne Division (Airsobile), Period Ending 31 July 1970, RCS CSFCR-65 (R2) (U)

At 160650, widinity YD918236, while supporting the insertion of Recon Team 3, B52, 5th SFG(A), an ARIC from Btry C, 4th Bn (Aerial Arty), 77th Arty (Ambl), received 25mm machine gan fire. Directed by the UHIH command and control aircraft, the Cobra engaged the area killing 35 enemy and destroying two 2½ ton trucks. The lat Plt, 2d Co, 81st Abn Rgr Bn (ARVE SF) was inserted near the target area to conduct father assessment of the ARA fires. The element made contact with an estimated 30 enemy, killing three and sustaining one US and one ARVE WIA. The platoon was unable to reach the target area and was extracted from a hot landing zone at 1820 hours by Co B, 158th Avn Bn (AH) (Ambl).

At 171055, YDA17398, a CH-47 from Co B, 159th Avn En (ASH) (ambl) received ground fire, crashed and burned. The aircraft was a total loss and five US were killed.

At 181845, A UHH sixcraft from Co C, 158th Avn Bn (AH) (Amhl) was reported missing with four crev members and two passengers aboard. The Aerial Rifle Platoon, Troop B, 2d Sqdn (Amhl), 17th Cav was inserted at YD555236 on 19 May to conduct a search for the aircraft. The platoon was unsuccessful in locating the aircraft and was extracted prior to darkness. One member of the missing aircraft crev, who had walked from the crash site to a small landing zone, was extracted at 191400 hours by a UH1H from Co A, 101st avn Hn (AH) (Amhl) on a mission for the 501st Signal Hn (Amhl). The injured crew member stated the aircraft was hit by ground fire, attempted to make a forced landing on a landing zone, crashed and rolled down a hill into a canopy covered area. He had no knowledge of the exact location of the aircraft or other crew members.

On 19 May, the 2d Co. Stat Abn Rgr Bn (ARVE) was inserted vicinity XD 907234 to conduct assessment of the ARA attack conducted on 16 May. The company photographed two destroyed 2k - 5 ton type vehicles and was extracted on 20 May. Sporadic contact with the enemy resulted in 13 ARVE WIA during the operation.

At 201735, vicinity YD495069, the Recom Plt and Co 1, 21 Bn (Ambl), 5021 Inf received intense small arms and SPG fire from three sides at 15 meters. The element returned fire, employed ARA and maneuvered against the enemy. Contact terminated at 1230 hours as the enemy fled leaving one KTA. US casulation were three KTA and nine WTA.

The 2d Bm (Ambl), 501st Inf completed refresher training on 19 May and redeployed in the AO on 20 May. The Bm conducted a combat assembly vicinity FSB ENIGE to conduct search operations in the TA TRACE River Valley and passed to the operational control of the 1st Bde.

Throughout the period 13 - 20 May elements of the 2d and 3d Battalions,

1-6

#### COMPUENTAL

Inclosure 1 (Operations Narrative) to Operational Report - Lessons Rearned, 101st Airbourne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65

1st Regt (ARVN) made contact with the enemy vicinity FKB PARBARA resulting in 65 NVA KIA and 11 ARVN WIA.

#### (4) 21 May - 1 June 1970

(a) On 21 May, the let En (Ambl), 50 let Inf moved by air from FS/OB KATHRYN to PHU Bal Combet Base and began preparation for battalian refresher training. The battalian passed from the operational control of the 1st Bde to OPCON of the 2d Bds. The 3d Bds second responsibility for the portion of the THER FORKS area of the SOKG BO River recated by the extraction of the 1st En (Ambl), 50 let Enf as Co B, 1st Bn (Ambl), 50 th Inf moved by air from FS/OB RAKKASAN to FS/OB KATHRYN to provide security for the firebase and conduct local patrolling. The 1st Ede continued combined operations southwest of HUE with the 2d Bn (Ambl), 50 linf and the 3d Bn, 3d Regt (ARVN) conducting operations against elements of two battalians of the 29th NVA Regt in the

On 24 May, Companies 4 and B, 1st Bn (Ambl), 501st Inf moved by mir to FSB KATERYN and passed to the operational control of the 1st En (Ambl), 506th to conduct patrol operations north and south of the firebase. This movement was made in reaction to increased energy activity in the area.

Also on 24 Mey, the 1st En (Ambl), 327th Inf terminated operations vicinity FS/OB MARTOCRE and moved south to FS/OB VECHEL to assume control of area Tango to conduct operations in coordination with the 3d En, 3d Regt (ARVE). The 2d En (Ambl), 502d Inf terminated operations in the vicinity of FSE VECHEL and moved north to FS/OB HASTOCRE, assuming control of area Uniform.

On 26 May, the 3d Bm, 1st Regt (ARYN) terminated operations in coordination with the 3d Bde, vicinity ES/OB O'HEILLY and BARRIAR, and moved by air to LA VANG to conduct stand down. The 4th Bn, 3d Regt (ARYN) moved by air from L4 VANG to vicinity YD2455, east of FS/OB BARRIARA, to conduct reconsalisance in force operations in the area.

On 27 May, Companies A and D, 1st hn (Arch), 501st Inf were released from OPCON of the 1st hn (Arch), 506th Inf and returned by air to FS/CB BIRNINGHAM and control of the parent unit. The 1st Hn (Ambl), 501st Inf terminated battalion refresher training and assumed control of area whiskey from the 1st Bn (Ambl), 502d Inf. The 1st Bn (Arch), 502d Inf moved to PHJ HAI Compate to prepare for battalion refresher training to begin on 28 May.

The 24 8de continued operations in the pisdment in the northern fringes of the campy of THUA THICK Province and conducted extensive patrol and night ambush operations in coordination with territorial forces to deny the energy access to the population in the constal lowlands.

The division continued to suplay extensive ground and serial sensor devices

#### CUNFIDERTIAL

to locate and monitor enemy movement and continued to engage suspected enemy locations with artillery fires and USAF aircraft. Det B52, 5th SYC(A) continued Operation BARBER (BARE maintaining reconnaiseance and roadrumer teams in the division area of operation.

- (b) Significant Activities. On 21 May, two ORMA balicopters from the 2d Sqin (Ambl), 17th Cav received ground fire at 1353 hours, vicinity YC 495839, and at 1625 hours, vicinity XD761248, crashed and barned. Both aircraft were total losses and three crew members were wounded in action.
- At 250940, vicinity MD499069, Co a, 2d Hn (Ambl), 502d Inf discovered twenty 4°x3°x4° bunkers containing bodies of twelve NVA killed by artillary, small arms and helicopter fire.
- At 231655, vicinity XD912271, a URIH from Co B, 158th Avn Bn (AH) (ambl), while conducting visual recommaissance in support of Operation BARKER (HADE, received ground fire, crashed and burned. Six US and two ARVN were killed in action, including the commanding officer, Let B52, 5th SFG(A).
- At 231800, and again at 2000 hours, at \$58 KATHEYN, Co A, 1st Bn (Ambl), 506th Inf was attacked by fire with 60mm and 62mm morter fire impacting inside the perimeter. Two to three 82mm morter rounds, received during the 2000 hour attack, contained agent CS. ARA and tube artillery was employed against suspected enemy locations. Results of the two attacks were three US KIA and 25 WIA.
- At 240600, vicinity MD075394 (2 KM SW of FBB HENDERSON), the 4th Bn, 54th Regt (ARVN) received HPG and small arms fire from an estimated enemy company surrounding their night defensive position. The element returned organic weapons fire and employed ARA and tube artillary. A sweep of the contact area revealed 45 NVA KTA. ARVN casualties were four KTA and 16 WTA.
- At 261010, in reaction to a contact by elements of Co C. 2d Bn (Ambl), 506th Inf which resulted in two US WIA, a UHIH Medevac helicopter from Co C. 326th Med Bn (Ambl), while lowering the jungle penetrator at MB328206, received one MFG round in the fuel cell, crashed and burned. All four crew members were killed in action.
- At 271048, vicinity YD456124, the Recon Fit, 1st En (Ambl), 506th Inf, while conducting patrol activities near FSB MAUREEN, received RPG and small arms fire from an enemy force at 35 meters. The element returned organic weapons fire and tube artillery. The enemy broke contact and fled. AGA was requested and arrived on station at 1105 hours and a pink team arrived at 1145. One NVA was killed by ARA fire. At 1808 hours the platoon engaged two enemy with small arms fire at 75 meters. An enemy force returned RPG, automatic weapons and small arms fire. ARA and gamenips arrived on station

#### CONTOENTAL

Inclosure 1 (Operations Remative) to Operational Report - Leasons Learned, 101st Lirborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFCH-65 (R2) (U)

and immediately engaged several enemy. Contest terminated at 1915 hours. A sweep of the area revealed six NVA killed by belicopter fire, six by ARA fire and seven by small arms fire. Two US were wounded in action.

At 280130, E3/OB O'METILIT, the 1st and 2d Companies, 1st En, 1st Regt (ARTH) received morter fire followed by a ground attack employing RPG and small arms fire. Elements on the firebase returned organic weapons fire and tube artillery. A flareship and ARA were requested and on station at 0155 and 0205 hours respectively. The enemy was repulsed before daylight and a first light sweep revealed 77 NVA KIA, two PV, 29 AE-47's, eight RPG launchers, three Soviet LPO flame throwers and two Chicom radios. Three ARVN were killed and 15 wounded in the action.

At 281950, vicinity YD581509, the PHONG DIEN District Chief was killed while driving to his home when he was attacked by Viet Cong employing B-40 rockets.

buring the period 29 May to 1 June, 15 enemy were killed in spondic activities throughout the division AC. Seven were killed by helicopter fire, four by small arms fire, two by tactical air strikes and two by artillery fire. An additional five NVA KIA were discovered in graves.

#### (5) 2 - 9 June 1970

(a) This period was marked by an increase in enemy contact with ANVN units and light contact with units of the division. ARVN and territorial force units accounted for 232 NVA and 20 VC killed in action. Thirty-seven enemy were killed in light contact with units of the division during the period.

On 2 June, the division provided eviation assets in support of the 2d Bm, 54th Regt (ARVN) in the successful defense of FS/CB TUN TAVERN against a determined attack by elements of the 65th NVA Regt which had moved from the BA LONG Valley area. Troops A and B, 2d Sqdm (Ambl), 17th Cav provided continuous air cover in the area during the period of contact.

At 021255, the 24 Rde passed OPCON of the 1st En (Ambl), 501st Inf to the 3d Rde and assumed operational control of the 1st En (Ambl), 506th Inf which moved by air from FS/OB KATHRYN to CAMP EVANS to assume the mission of Division Resaly Force and prepare for battalion refresher training. The 1st En (Ambl), 501st Inf moved by air from FS/OB BIRMINGHAM and AMSENAL to FS/OB KATHREN and assumed responsibility for area Sierra. The 1st En (Ambl), 502d Inf redeployed in the AO vicinity FS/OB BIRMINGHAM to provide occurity for the firebase and conduct patrol and ambush operations in the area.

On 5 June, division aviation assets supported the insertion of the 3d

Inclosure 1 (Operations Narrative) to Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, ROS CSFOR-65 (R2) (U)

Bn, 1st Regt (ARVN) and the extraction of the 2d Bn, 54th Regt (ARVN) in the FS/DB TON TAYERN area. The 3d Bn, 1st Regt (ARVN) passed to the operational control of the 54th Regt (ARVN). The 1st Bn, 1st Regt (ARVN) moved by air from FS/DB DARBARA and O'REILLY to LA VANG. The 2d Bn, 1st Regt (ARVN) remained in the FS/DB DARBARA - O'REILLY area and assumed the security mission for FS/OB O'REILLY.

At COCCO, the 3d Bde assumed OPCON of the 1st Bm (ambl), 506th Inf from the 2d Bde as the battalion completed refresher training and moved by air from CAMP EVANS to FS/OB RIFCOMD and CRANTE to provide security for the fire-bases and conduct operations in area Quebec. The 2d Bm (ambl), 506th Inf terminated operations vicinity FS/OB RIFCOMD and moved by air to GAMP EVANS to prepare for refresher training and assumed the mission of Division Ready Force.

Also on 8 June, the 1st Bm, 1st Regt (ARYM) moved by air from 14 YANG to FS/OB O'MEHLY to provide security for the firebase and conduct local operations in the vicinity of the firebase. The 2d Bm, 1st Regt (ARYM) moved by air from FS/OB O'REHLY to LA VANG to provide security in the area and stand down.

On 9 June, Bet B52, 5th SFG(A) antiracted all teams from the division area of operation and conducted stand down at MAI LOC. During the period 16 May - 9 June the detachment accounted for 50 enemy killed in action while sustaining seven US KIA, eight US VIA, 4 ARVN KIA and 36 ARVN WIA.

(b) Significant Activities. At 020430, F3/OB TUN TAYSRN, the 2d Bn, 54th Regt (ARVN) received an attack from all sides of the firebase by the 9th En, 66th NYA Regt employing 62mm mortar, 75mm recoilless rifle, RPC and small arms fire. Elements on the firebase returned organic weapons fire and employed flareships, ARA, tube artillery and air strikes. The enemy penetrated the perimeter and was able to occupy bunkers on the east side of the firebase. The situation was static at 0645 hours. At 0930 hours a renewed assault was made on the firebase from the north and northwest but was immediately repulsed. The enemy was driven from the firebase by 1115 hours although it continued to receive 75mm recoilless rifle and 82mm mortar fire sporehoally throughout the day.

A sweep of the contact area revealed 81 NVA KIA and one PW. Three VS from the 501st Sig Bn (Amhl), in support of the 1st Bn, 54th Regt (ARVN) were casualties. Two were killed and one was wounded in action. ARVN casualties were 50 KIA and 119 WIA. Two US and one Anstralian advisor were wounded in action.

At 031455, vicinity YDC22354 (1 KM w of FSB LANGLEY), the fat Bn, 54th Regt (ARVN) discovered 20 NVA killed by air force and two bunkers with overbead cover destroyed by air strikes.

#### CUNTULLIAL

Inclosure 1 (Operations Namestive) to Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFCR-65 (R2) (U)

At 041500, vicinity FS/OB TUN TAVERN (18056328), the 3d Bm, 1st Regt (ARYM), in a sweep conducted near the firebase, discovered 45 NVA killed by air strikes within the previous 72 hours. At 1640 hours the battalion engaged an enemy force with organic seapons fire, killing 10 NVA while sustaining two KIA. On the following day, elements of the battalion killed four more NVA that had attached with 82mm mortar and small arms fire one kilometer southeast of FS/OB TUN TAVERN.

At 060550, the 3d Co, 3d Bn, 1st Regt (ARVN) engaged an estimated two enemy commanies with small arms fire at a range of 150 maters at 10043331. Tube artillery and ARA were employed and a sweep revealed 11 NVA KTA. At 1410 hours, vicinity 10055543, elements of the 1st Bn, 54th Regt (ARVN) discovered the bodies of 12 NVA KTA.

On 8 June, elements of the division discovered the bodies of seven NVA killed by artillary and air strikes in previous contacts and accounted for 17 more NVA KJA on 9 June as contact with enemy elements in the division AO remained light.

- (6) 10 16 June 1970
- (a) On 10 June, elements of the K4C Rm, 4th NYA Regt launched attacks by fire against units of the 2d Ede cocapying FS/OB LOS RAMOS, PHO LOC District Headquarters and NUOC NGOT Bridge. A simultaneous: ground and mortar attack was directed at FS/OB TUNAHAWK. As part of the reaction to this contact the division provided aviation assets to the HOC RAO Company and territorial forces for movement and assualt into PHU LOC District to regain contact with the enemy after their withdrawal.

Also on 10 June, Det B52, 5th SFG(A) moved by vehicle to QUANC TRI and prepared for movement to NHA TRING for stand down.

Foor weather conditions on 12, 15 and 14 June caused postgonement of several tactical moves by air and the cancellation of 18 sorties of tactical air support. Improved weather conditions on 15 June permitted the division to continue extensive armed serial recommunication in the division AO and to accomplish the repositioning of several units.

At 150900, the 1st En (Amhl), 501st Inf moved by air from FS/OB KATHRYN and passed from the operational control of the 3d Bde to OFCON of the 2d Bde. The battalion assumed responsibility for security of FS/OB RAKKASAN and initiated patrol and ambush operations in area Homso to prevent infiltration of NVA and guerilla forces into the populated lowlands.

The 1st Sn (Ambl), 506th Inf moved by air from the vicinity of FE/OB RIFCORD to vicinity FB/OB KATURYM to assume responsibility for area Sierra.

1-11

Inclosure 1 (Operations Narrative) to Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 51 July 1970, RCS CSFOR-65 (R2) (U)

and conduct operations to locate and destroy elements of the 80% NVA Regt.

The 2d Bn (Ambl), 506th Inf completed battalion refresher training and redeployed in the AC moving by air from CAMP EVANS to FR/CB RIFCORD to assume responsibility for area Quebec. The battalion provided security for the firebase and initiated reconnaissance in force operations in the area.

. The 1st Bn, 3d Regt (ARVN), operating in coordination with the 1st Bn (Ambl), 327th Inf, conducted a combat assault on 15 June into the area north-seat of FSB (ECRGIA, vicinity WD4406, and begin recommaissance in force operations to the south on two axes.

(b) Significant Activities. At 100140, the 4th MVA Hegt began form separate attacks on US units located in PHU LCC District. Co D(-), 2th An (Ambl), 327th Inf at FS/OB TOWNHAWK, received a ground attack supported by 82mm mortar, RFG and small arms fire by the 7th Sapper Company. Tube artillery, ARA, 61mm mortars, forgass and organic weapons were employed against the enemy. Contact was broken at 0218 hours, although sporadic mortar fire continued until 0550 hours. None of the enemy, estimated to be 70 in etrength, penetrated the perimeter. Twenty-eight MVA were killed and three prisoners were captured. One US was killed and two were wounded in action.

At 100144, PAU 100 District Headquarters and the command post, 24 Bm (Amb1), 527th Inf received two RPC rounds, one 122mm rounds and 20 - 25 82mm mortar rounds resulting in eight US WTA, including two WS MACV advisors and one USMC.

Between the hours of 0150 and 0445, Co B(-), 2d Bm (Ambl) 327th Inf, at F3/CB LCS BANCS received approximately twelve 82mm mortar rounds, most of which impacted outside the perimeter. One US was wounded in action.

At 100158, mobile training team number 10, located vicinity MUCC NGOT Bridge (2D152010), received 15 mortar rounds, followed by three more at 0540 hours. The element employed 61mm mortar fire on suspected enemy locations.

At 100520, the 1st Co, 4th Mm, 54th Regt (ARVN), at FS/CB RCY, received 10 - 20 82mm mortar rounds. Counter mortar fires were employed, no casualties were sustained.

The period 11 - 14 June was marked by light activity in the division AO. Two US were killed in action as the division accounted for 19 NVA KIA. Two US were killed in action as the division accounted for 19 NVA KIA. Two USA bodies were found in graves or hidden from view in heavily vegetated areas. Cunships from the 22 Squn (Ambl), 17th Cav accounted for three NVA KIA, USAF air strikes killed two NVA, and ground action resulted in two NVA KIA.

1-12

#### Contolita

Inclosure 1 (Operations Marrative) to Operational Report - Lessons Learned, 101st Airhorne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

At 150945, gammips from Prp A, 2d Sqdn (Ambl) 17th Cav sugged an enemy force vicinity XD869365. At 1034 hours the Asrial Rifle Platoon, Trp A, 2d Sqdn (Ambl), 17th Cav was inserted to sweep the contact area and confirmed twelve NVA killed by helicopter. The platoon engaged one enemy at 50 meters at 1215 hours resulting in one NVA KIA.

On 16 June, in area Oscar, vicinity FEB CEORCIA, the lat Bn. 3d Regt (ARYN) made contact with enemy forces employing small arms, RPC and 60mm mortar fire at 0945, 1030 and 1430 hours. The 1st and 2d Companies employed small arms and artillery fire resulting in these NVA killed by artillery and eight NVA killed by small arms. One ARVN was killed and 20 wounded in the contacts.

#### (7) 17 - 25 June 1970

(a) On 17 June, at XB898316, elements of Trp A, 24 Sqin (Ambl), 17th Car, while conducting visual recommaissance in the FSB LEATHERMECK area, observed 10 RVA in the open, 150 - 200 log reinforced bunkers, 15 pup tents, two burning camp fires, murrous lean-tos, 10 latrices and a network of trails leading into the area.

Extensive visual recommaissance by elements of the 2d Equn (Ambi), 17th Cav throughout the day on 18 June revealed beavy enemy activity and a large number of additional bunkers in the FSB IDATHERMSCK area. The area was engaged by gunships, artillery and air strikes throughout the afternoon. There were two incidents of ground to air fire in the area.

On 19 June, elements of the 2d Sqdn (Ambl), 17th Cav, while conducting bomb damage assessment of air force tactical air strikes, located an evacuated 600 man hospital complex west of FEE HETHERMECK. Trp D, 2d Sqdn (Ambl), 17th Cav was inserted into the area and discovered medical supplies, rice, granades and miscellaneous equipment.

On 21 June, Trp D and the Recommaissance Company (HDC BAO), 1st Inf Div (ARVN) conducted a combined assault into the FNB INATHERMECK - ROBIN area to seek out and destroy enemy bunkers and cache sites. Continuous air cover was provided by the 2d Sqdn (Ambl), 17th Cav.

Also on 21 June, the 1st Bn (Ambl), 501st Inf redeployed in the AC. passing to the operational control of the 1st Bde and moving by air to FSB BASTOME. Of A secured the firebase while Companion B, C and D initiated search and attack patrols in the vicinity of the firebase.

The 2d Bn (12hl), 502d Inf moved by vehicle from vicinity FSB PASTOCHE to CAMP SAGE and prepared for battalion refresher training and assumed the mission of Division Ready Force.

#### Confidental

Inclosure 1 (Operations Marrative) to Operational Report - Leasons Jearned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

On 22 June, a task force under control of the 3d Ede, operating in coordination with the 5th En, 2d Regt (ARVW), consisting of Co A, 2d En (Ambl), 502d Inf, Co B, 1st En (Ambl), 501st Inf, the HOC EAO Company, and elements of the 2d Sqdn (Ambl), 17th Cav, conducted operations to further exploit enemy bace areas and cache sites in the vicinity of FEE LEATHERMECK and SHEFFEHD. Co A, 2d En (Ambl), 502d Inf and Co B, 1st En (Ambl), 501st Inf passed from operational control of the 1st Ede to OFCON of the 3d Ede and assaulted into FEE SHEFFEED. Elements of the 2d En (Ambl), 11th Arty were moved by air to FEE SHEFFEED and SARCE to provide artillery support to the task force.

On 23 June, Det B52, 5th SFG(A) returned to MAI LOC and prepared to resume Operation BARBER GIADE.

On 24 June, the 5th En, 2d Regt (ARVN) terminated operations in coordination with the 3d Ede in the ESB LEATHERWECK area and returned to DONG Ha.

On 25 June, the 3d Bde Task Force was withdrawn from the northwestern portion of the division AO. Co A, 2d Bn (Ambl), 502d Inf and Co B, 1st Bn (Ambl), 501st Inf returned to parent unit control; the HOC BAO Co returned to HUE and was released to the control of the 1st Inf Div (ARYN); Btry A(-), 2d Bn (Ambl), 1th Arty moved by air to FSB RIPCOND; and the 2d Sqdn (Ambl), 17th Cav resumed normal operations. Btry C(-), 2d Bn (Ambl), 11th Arty remained at FSB SARGE and prepared to redeploy in the 2d Bde AO.

Also on 25 June, Det B52, 5th SFG(A) resumed Operation BARRER GLADE with insertion of the 2d Plt, 44th Ranger Co into the vicinity of XD8344.

(b) Significant Activities. At 170340, vicinity 10441066 (Area Oscar), the light CF, 2d and 3d Companies, 1st Bn, 3d Regt (ARYN), operating in coordination with the 1st Bn (Ambl), 327th Inf, engaged an estimated enemy platocomes their night defensive position. Organic weapons, tube artillery, ARA, and a flareship were employed and resulted in 32 NVA KIA. ARVN casualties were four with minor wounds.

On 18 June, in the Vistnamese Salient (XD8631), gamehips, ARA, and air strikes were employed resulting in 26 NVA KIA. Weather precluded the insertion of Trp D, 2d Sqdn (Ambl), 17th Cav into the area to conduct patrol and surveillance operations.

The weather cleared permitting insertion of Troop D on the 19th and a recently evacuated hospital complex was discovered. Him enemy were killed in the Vietnamese Salient.

The insertion of Trp B and the ARP, Trp B, 2d Sodn (ambl), 17th Cav and the HOC BAC Co into the vicinity of FSB ROBIN on 21 June to perform bond damage assessment and to exploit B52 strikes, resulted in discovery of 62 bunksrs.

tifying elements of the 7th Bm, 66th NVI Regt, and capture of two Pris. Three US were wounded in action when the ARP, Trp B, 21 Soin (ambl), 17th Cav received small arms fire and fragmentation grenades from 3 - 5 enemy at 15 meters. The element returned fire but the enemy withdrew and a sweep revealed no enemy casualties.

The 3d Bde combined task force, inserted into the vicinity FSE [EATHERNECK on 22 June, located and destroyed enemy installations and food stuffs until they were extracted on 25 June. Totals for the period 17 - 25 June in the area were 69 NVA KJA, two PW, 52 tons of rice, three tons of salt, 10 cases of miscellaneous foodstuffs, three individual and one error served weapon captured, 19,500 AK-47 rounds, 4,600 12.7mm rounds, 310 EFG rounds, 40 75mm recoilless rifle rounds, and 15 122mm rockets. A total of 283 bunkers were destroyed.

At 221600, vicinity TD172266, (1 EM W of ESB MEROME), the 2d Co, 1st Bp, 1st Hegt (ARYN) discovered a training area consisting of a rifle range, 50 buts with underground bunkers, and an ammunition bunker containing 10,000 AK-47 rounds, 200 RFG rounds and 40 BVA uniforms with no markings.

At 231045, vicinity 184256, (2 KM SW of FSB JERONE), the let Bn, 1st Regt (ARYN) engaged an estimated two enemy plateons with organic weapons, gunships and tube artillery. The enemy returned small arms fine and fled. A sweep of the contact area revealed 47 NVA KIA and a large enemy base camp resulting in 10 IMC, 17 CSWC, 158,450 AK-47 rounds, 30,000 12.7mm machinegan rounds, 790 RPC rounds, 30 anti-tank mines, 160 bankers, two animal cages and two PW cages. The area west and south of FSB JERONE is a known rear service area supporting the 812th NVA Regt and the 7th Front. Four ARYN were wounded in action.

At 241430, vicinity YD217232, the 1st En, 2d Regt (ANVN) discovered graves containing 43 NVA killed by an air force B52 strike approximately 10 days earlier.

- (6) 26 June 7 July 1970
- (a) The division continued to provide eviation assets to the 1st Inf Div (ARVE) and the 1st Ede, 5th Inf Div (Mach) throughout this period. Assets were also provided to Det B52, 5th SFG(A), until the termination of Operation BAREER GLADE on 30 June. There were a total of 117 incidents of aircraft receiving ground fire. One aircraft was shot down by 12.7mm machinegum fire and crashed. Nineteen other aircraft were rendered non-flyable.

The division continued extensive employment of ground sensor devices to locate and monitor enemy novement and engage suspected enemy locations with extillery and marine, newy and USAF aircraft. During the period a total of

Inclosure 1 (Operations Marrative) to Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Pariod Ending 51 July 1970, RCS CSFOR-65 (R2) (V)

323 activations were recorded and 3005 rounds of mixed caliber artilleny summation were fired in reaction.

The division continued to conduct operations to locate and destroy ensuy forces, staging areas and lines of communication, and to prevent enemy infiltration into the populated lowlands and disruption of elections held on 28 June.

On 26 June, division aviation assets were provided for the assault of the 4th En, 54th Regt (ARYN) into the area vicinity FSE BRICE. The battalion CP collocated with the CP, 2d En (Ambl), 501st Inf to facilitate coordinated operations against elements of the 29th NVA Regiment in area Xray.

On 28 June, an artillery raid was conducted from FSB BLAZE by Btry B, 1st Bn, 83d Arty. Preplanted targets along route 548, vicinity FSB REFUEZVOUS wate engaged.

On 29 June, the 2d Bn (Amb1), 502d Inf completed battalion rufresher training at CAMP EACHE and redeployed by vehicle to the vicinity of FSE BASTOCKE. The battalion assumed responsibility for area Uniform, security of the firebase, and initiated search and attack patrols in the vicinity of the firebase. The 1st En (Amb1), 501st Inf moved from FSE BASTOCKE to PHV LOC District, passed to the operational control of the 2d Hde, and assumed responsibility for area Zulu and security of FSE LOS BANGS and TOMAHAWK. The 2d Bn (Amb1), 327th Inf moved by air and vehicle from PHV LOC District to CAMP EAGLE and began preparation for battalion refresher training. The battalion also assumed the mission of Division Beady Force.

On 30 June, Dat B52, 5th SFG(A) terminated Operation BARRER GLADS and prepared to move by air to WHA TRANG.

The period 1 - 7 July saw a marked increase in enemy activity in the 3d bde area of operation as elements of the 803d and 6th NVA Regiments conducted daily attacks by fire on FSB RIPCORD. More than 160 rounds of 60mm and 82mm worter and 75mm recoilless rifle fire were directed at the firebase during the first seven days of July, resulting in 21 US WDA. In the vicinity of the firebase US units engaged in 25 enemy and eight friendly initiated contacts, resulting in 30 NVA KIA, nine DWC, and two CSWC. US casualties were 16 killed and 104 wounded.

On 1 July, the Aero-rifle Flatoon, Trp C, 2d Sqin (amhl), 17th Cav was inserted west of FSB RIFCORD in reaction to the energy attacks by fire on the firebase. When the platoon received fire on the landing zone, frp D, 2d Sqin (Ambl), 17th Cav was inserted to reinforce the ARP. These elements passed to operational control of the 2d Bn (Ambl), 506th Inf until they were extracted on 2 July, returning to parent unit control at 1810 hours.

"Also on 1 July, the 1st Bde passed operational control of the 2d Bn (Ambl),

Inclosure 1 (Operations Marrative) to Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Roding 31 July 1970, RCS CSFOR-65 (R2) (U)

501st Inf to the 2d Bde and responsibility for FS/OB ERICK and agea Xray to the 4th En, 54th Regt (ARVN). The 2d Bn (Ambl), 501st Inf moved by air from vicinity FS/OB ERICK to PHD BAI Combat Base to prepare for povement to CAMP EVANS and redeployment.

On 2 July, the 2d En (Ambl), 501st Inf passed to the operational control of the 3d Ede and assembled into landing zones south and southwest of FS/OB RIFOURD. The battalion CP collocated on the firebase with the CP, 2d En (Ambl), 506th Inf.

On 5 July, three battalions were repositioned in support of the battalion refresher training program. The lat Bn (Ambl), 501st Inf terminated operations in PHU LCC District and moved to vicinity FS/CB VECHL and passed OFCON to 1st Bds. The 1st Bn (Ambl), 527th Inf terminated operations vicinity FS/CB VECHL and MBA to CAMP EAGLE, closing at 1812 hours, and began preparation for refresher training. The tattalion assumed the mission of DRF at ORC7 hours. The 2d Bn (Ambl), 527th Inf completed refresher training and returned to PHU LOC District and reassumed responsibility for area Zulu.

On 5 and 6 July, Troops C and D, 2d Sqin (Ambl), 17th Cav moved to Chang Tri, joining Troop A, to facilitate the concentration of airmobile cevalry elements in the northwest portion of the division AC. This movement was in reaction to intelligence concerning infiltration of the 9th Regt, 304th SVA Division into South Vietnam.

On 6 July, additional artillery (three 155mm howitzers) from Etry A, 2d Bn (Ambl), 11th Arty were moved from FS/CB RAKKASAN to FS/CB RIPCORD in support of operations in that area. Six 105mm howitzers of Stry B, 2d Bn (Ambl), 319th Arty and six 155mm howitzers of Stry A, 2d Bn (Ambl), 11th Arty were located on the firebase at that time.

On 7 July, the 1st Bn, 5d Regt (ARVN) terminated operations vicinity FS/OB VECHEL and CECRGIA and moved by air and vehicle to CAMP SAILY to begin ner fresher training for future operations.

(b) Significant Activities. On the morning of 26 June, CAMP EACHE was twice attacked by fire. At 0009 hours approximately ten 82mm mortar rounds impacted in the area of the 2d En (Ambl), 320th Arty and the 4th En (Aerial Arty), 77th Arty (Ambl). One US was killed and eight wounded during the attack. Two UHIH helicopters and one seabut were damaged, and one maintenance tent was destroyed. At 0247 hours seven 122mm rockets impacted in the areas of Co E. 159th Avn En (ASH) (Ambl), 4th En (Aerial Arty), 77th Arty (Ambl), 265th ERG, 801st Maint En (Ambl), Div Arty, and G Sector of the CAMP EAGHE perimeter. Results were four US WIA; one AHIC helicopter and one 3/4 ton M37 truck destroyed; one CH-47, one AHIG, two 2s ton M35 trucks, two 3/4 ton M37 trucks and two M151 jeeps, damaged. Aerial rocket artillery, tube artillery and mortar fire was employed on suspected enemy locations. Aerial

1-17

Inclosure 1 (Operations Narrative) to Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 51 July 1970, RGS CSFOR-65 (R2) (U)

reconnatusance of the rocket belt and suspected enoug firing positions revealed one NYA KIA.

At 250235, vicinity M242116, the let Pit, Co B, let Rn (Ambl), 506th Infreseived RPG and small arms fire in their night defensive position. The platoon returned small arms fire and amployed ARA and a flareship. A first light awarp of the contact area revealed six NVA KIA, two AH-47s, two RPG launchers, two RPG rounds, and 25 t pound satchel charges. UB casualties were four KIA and eight WIA.

Light and sporadic contact in the division area of operation during the period 26 - 30 June resulted in eight NVA KTA and one US killed and eleven wounded.

On 1 July, at 0708 hours, on FS/CE RIPCORD, the CP and Co D. 2d Bm (Ambl), 506th Inf received five 82mm mortar rounds and small arms fire from the south-east. At 0850, the firebase received 15 rounds of 92mm mortar fire which impacted inside the perimeter. At 1345 hours, the enemy employed 16 75mm recoilless rifls rounds, 6 - 8 impacting inside the firebase perimeter. At 1912 hours, four rounds of 82mm mortar fire landed on the firebase. Artillery, air strikes and organic mortar fire were employed on suspected enemy locations throughout the day. Fifteen US received minor wounds during the day, all from Btry B, 2d Bm (Ambl), 319th Arty, located on the highest point of the firebase. Mest of the casualties occurred as the battery was employing counter-battery fire.

At 011045 hours, approximately 1500 meters southeast of FS/OB RIPCORD, Co B, 2d En (Ambl), 506th Inf received fire from 75 meters west of their position. The element returned organic weapons fire and a pink team was employed. A sweep of the area efter contact revealed one NVA KIA. Two US were wounded. At 2225 hours the company received 8 - 10 RPG rounds and small arms fire from 100 meters south of their position. Elements returned fire and the enemy withdraw. There were no friendly casualtios or damage.

Also on 1 July, Regional and Popular force units joined by ARVN infantry and armored elements, and the EOC RAO Company, waged a 15-hour battle near Quang Tri with main force enemy units, resulting in 135 enemy killed and 17 captured. CVM forces suffered 12 KIA.

At 020346 July, vicinity ID337172 (Hill 902), the CP and 1st and 2d Plts, Co C, 2d Bn (Ambl), 506th Inf received RPC, satchel charges and small arms fire in their night defensive position. An estimated sapper company, in a well organized and executed attack, were successful in panetrating the perimeter and occupying positions inside the HDP. The enemy sappers and elements of Co C exchanged satchel charges and fragmentation grandes in a fierce battle until the enemy within the perimeter were killed, and the remainder withdraw at ap-

Inclosure 1 (Operations Marrative) to Operational Report - Lessons Loarned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RGS CSFOR-65 (R2) (U)

proximately 0420 hours. The company commandor was killed in the initial exchange of fire. The company modic immediatley organized the defense of the position until relieved later by the artillery forward observer. Sporadic contact and mortar fire continued until approximately 0530 hours. Results of the action were 15 NVA KIA, seven US KIA, six US VIA and one US KIA.

On 3 July, between the hours of 1415 and 1520, in the vicinity of K09744, seven kilometers northwest of the KHE SARH aimstrip, aircraft from Trp A, 24 Sqdn (Ambl), 17th Cav, conducting armed aerial reconnaiseance, engaged approximately 14 enemy, killing twelve. The ARP, Trp A, 24 Sqdn (Ambl), 17th Cav was inserted at KD790443, engaged two enemy in bunkers resulting in two SVA KTA, one US KTA, and two US and one Kit Carson scout wounded. The platoon was extracted at 1820 hours.

At 040950, vicinity YD572170, an individual from Co C. 2d Bn (A201), 501st Inf, while the company was conducting a search and attack operation southeast of FS/08 RIPCORD, detonated a booby trap consisting of five 62m mortax rounds, placed along the trail and daisy chained. Three rounds were placed on the right side of the trail and two on the left. Five US were killed and five wounded.

On 4 July, FS/OR RIPCORD was attacked by fire for the fourth day in a row. A total of nine attacks were directed at the firebase, three consisting of 82mm and 60mm mortar CS rounds. Three US were wounded.

At 050010, vicinity ID377159, Co C, 2d Hn (Ambl), 501st Inf, while in their night defensive position southeast of FS/CE RIFCORD, engaged three enemy with small arms fire 20 meters to the west of their position. The enemy returned small arms fire and satchel charges, and appeared to fise. At 0050 hours the company was attacked with satchel charges and returned organic weapons fire. The enemy again withdrew and ARA and a flareship were employed. A sweep under illumination revealed no enemy casualties. Three US were wounded.

At 0605 hours, the company received 6 - 10 MPC rounds and small arms fire, again from the west. This time a sweep revealed five NVA EIA, five AK-47s, twenty-eight 1-pound satchel charges and two MVA gas masks. One US was killed and 14 were evacuated for wounds.

At 051240, vicinity Y0336161, three kilometers south of RE/OB RIPCORD, Co A, 2d Em (Arbl), 506th Inf engaged 8-10 enemy with small arms and artillery fire, killing five NVA. Two US were wounded by RPG fire.

On 6 July, enemy contact in the F5/OB MAUREEN area by elements of the lat En (Ambl), 506th Inf resulted in three NVA KIA, and 20 US WIA. At 1730 hours, three kinesters southwest of F5/OB RIPCORD, 15 US were wounded in Co A, 2d En (Ambl), 501st Inf, by small arms fire and fragmentation granades from an estimated enemy company on all sides of the friendly position.

### CUMIDENTAL

Inclosure 1 (Operations Marrative) to Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFCR-65 (R2) (U)

At 061530, vicinity XD745455, a ranger team from Co L (Ranger), 75th Inf made contact with an estimated enemy company 50 meters north and west of their position. Organic venpons, ARA and a pink team were employed, resulting in 15 NVA KIA. Six rangers were wounded.

At 070940, vicinity, YB334194, west of FE/OB RIFCORD, while assaulting on Hill 1000, Co D, 2d Bn (Ambl), 501st Inf received small arms fire and satchel tharges from an enemy force located in bankers, 30 meters from their position. The company employed organic weapons fire, tube artillery, ARL, and air strikes on the enemy positions. Contact was broken at approximately 1500 hours as the company moved off the hill, having suffered three HIA and 19 WIA. Six NVA were killed in the action.

Other enemy contact in the vicinity of FS/OB RIPCORD, on 7 July, by elements of the 2d Bn (Ambl), 506th Inf and the 2d Bn (Ambl), 501st Inf, resulted in one US KTA and 28 WTA.

#### (9) 8 - 16 July 1970

(a) In reaction to intelligence information indicating the possibility of infiltration by the 9th Regiment, 304th NVA Division into South Vistner, to reinforce and replace the weakened 66th MVA Regiment, recommaissuance and surveillance efforts in the northwestern portion of the division 40 were intensified. Extensive efforts to interdict the infiltration of the 9th Regt culminated at approximately 1130 hours on 8 July, as a pink team, from Try A, 21 Son (Ambl), 17th Caw observed 150 - 200 enemy in the open, vicinity E08236. The area was engaged by machinegun and rocket fire from the pink team and a command and control sircraft accompanying the team. Additional gunship and ARA support was requested, and, within 30 minutes, was on station engaging the enemy. At 1358 hours, Trp D, 2d Sodn (Ambl), 17th Cay was inserted into the contact area to make a ground sweep and capture a prisoner. The troop made contact with the enemy and was extracted at 1758 hours, having captured three prisoners and a large number of enemy documents, which identified the 9th MVA Regt. Pink teams, and sections of ARA from the 4th En (Asrial Arty). 77th Arty (Ambl), providing relief on station, continued to engage the enemy throughout the day, resulting in 139 enemy killed.

In reaction to this activity, Operation CLINCH VALLEY, employing elements of the 3d Bde and the 3d Regt (ARVN), was initiated at 091315 hours. Btry B, 2d Bn (Ambl), 11th Arty was cirlifted from FS/OB VECHEL to FS/OB SARGE. The 2d Bn (Ambl), 502d Inf moved by air from FS/OB BIRMINGHAM to MAI LOC and conducted an airmobile assault into FS/OB SEEPHSHE to provide security for Btry A, 48th Arty (ARVN). The battalion passed from operational control of the 1st Bde to operational control of the 3d Bde. Co B secured the firebase while companies A, C and D conducted security operations in the wicinity of the firebase. The 1st Bn (Ambl), 506th Inf passed from operational control of the 3d Bde to

Inclosure 1 (Operations Narrative) to Operational Report - Lessons Mearned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSEUR-65 (R2) (U)

the 1st Bds, and moved by air from FS/OB KATHRYN to FS/OB BASTOCKE, assuming responsibility for the firebass.

On 10 July, the 1st and 2d Battalions, 3d Regt (ARVN) assaulted into FS/OB SMAPPER and SMIPH, respectively, to begin recommassance in force operations. The 3d Regt light CP moved by air to FS/OB SHEPHERD. The 3d Reg tactical CP moved to CAMP CARROL and maintained close coordination with the 3d Regt (ARVN).

On 11 July, division aviation assets were provided to support the assemble of a plateon of the HAC BAO Company, with four members of Co & (Ranger), 75th Inf, into the CLINCH VALLEY area. The assemble and subsequent patrolling operations culminated an extensive training program conducted by the Screaming Sagle Replacement Training School (SERTS).

The 1st En (ambl), 327th Inf completed refresher training and moved by vehicle and air, from CAMP RACHE, to PS/OB VECHEL and KATHAYM. The just Bn (Ambl), 501st Inf moved from FS/OB VECHEL to PHO BAI Combat Base, assumed the mission of DRF, and prepared for refresher training.

The 2d Bm (Ambl), 501st Inf moved from FS/CE RIPCORD and vicinity, to CAMP RVANS, to refit and prepare for redeployment against elements of the 603d NVA Regt, vicinity FS/CE RIPCORD. On 12 July, the battalion assaulted into the vicinity of YD3519 and YD3118 and began attacks to the south and east.

Operation CLINCH VALLEY was terminated at 151802 July, as the let and 2d Bn, 5d Regt (ARYN) extracted from FS/OB SMAFFER and SMITH to vicinity MAI LOC and then moved by air to CAMP SALLY. The 2d Bn (Ambl), 502d Inf moved by air from FS/OB SHEFHERD to CAMP EAGLE, returned to operational control of the 1st Bde, and prepared for redeployment.

Results of Operation CLINCH VALLEY (Period 091315 to 151802 July) were 226 NVA KIA (188 by US. 38 by ARVN), 15 INC (ARVN), and 14 CSWC (3 by US. 11 by ARVN). There were no Allied casualties reported during the speration.

Elements of the 903d and 6th NVA Regiments continued to conduct stand-off attacks against PS/OB RIPCORD during the period 8 - 16 July. The enemy employment of 60mm and 82mm mortar and 75mm recoilless rifle fire, on 10 July, resulted in two US killed and 17 wounded, on the firebase. Ground action around the firebase, vicinity fills 1000 and 805, resulted in ten US KIA, 52 US WIA, and 12 MVA XIA.

Between the hours of 1000 and 1600, on 16 July, the USS EDSON fired 224 five inch rounds at bankers and caves in the mountains north of PRF LOC District, sealing four caves, and causing two secondary explosions.

(b) Significant Activities. At 081130 hours, violatty KD826363, aircraft from Trp A, 2d Squn (Ambl), 17th Caw observed 150 - 200 RVA in the open. The

## COWIDERIAL

Inclosure 1 (Operations Marrative) to Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

area was engaged by gunchips and ARA, resulting in 50 enemy killed. Air to ground contact continued throughout the day. At 1230 hours, ten more enemy were killed by gunships in the vicinity of XD826363. Trp D, 2d Sqdn (Ambl), 17 Cav was inserted at this location, at 1538 hours and captured three prisoners. While collecting enemy equipment, weepone and doomsents for extraction, and sweeping the contact area, the troop was engaged by an estimated battalion size enemy force. During the ongagement, 24 NVA were killed and Tro D suffered six KTA and five WIA before being extracted at 1758 hours. Aircraft screening the ground troop continued to engage enemy in the area. At 1900 hours, vicinity KD825363, sircraft from Trp A observed and engaged an active 12.7mm machinegum position, destroying the weapon, one RPG lannoher, one radio and four rucksacks lying in the vicinity. At 1745 hours, a command and central aircraft, flown by the CO, 2d Sqdn (Ambl), 17th Cav, landed and extracted one wounded NVA PW. The final contact of the day occurred at 1919 hours, when siroraft from HHT, 2d Squn (Ambl), 17th Cav observed 10 - 15 enemy near an active 12.7mm machinegum position. The area was engaged with M60 machinegum fire and ANIC gunships, resulting in the destruction of the weapon and 10 onery killed.

Also on 8 July, vicinity FS/OB RIPCORD, the onemy again refused to be disloded from Hill 1000. Companies C and D, 2d Bn (Ambl), 506th Inf were engaged with small arms and automatic weapons fire by an enemy in well fortified bunkers, at 1050 hours. Intensive fire from at least three mutually supporting bunkers, pinned the companies down. One bunker was neutralized with M72 LAW fire, but the other two could not be destroyed. Contact was terminated at approximately 1500 hours as the companies again moved off the hill. US can walties were two killed and four wounded.

At 091615 hours, vicinity XD626363, aircraft from Trp A, 2d Sqdn (Ambl), 17th Cav observed ten NVA bodies killed during the previous night by heavy artillery employed from CAMP CAMROL by Btry B, 8th En, 4th Arty. Cavalry aircraft killed two other enemy in the KME SANH Plateau area during the day.

On 10 July, beginning at 0735 hours, FS/OB RIPCORD was attacked by fire on eight exparate occasions during the day. The enemy employed 60mm and 82mm mortar and 75mm recoilless rifle fire, resulting in two US KIA and 17 US WIA.

Also on 10 July, aircraft from troops A and B, 21 Squn (Ambl), 17th Cav killed 26 NVA in scattered air to ground contact in support of Operation CLINCS VALLEY.

On 11 July, Troops A and B killed 14 NVA in support of ARVN ground forces in the CLINCH VALLEY AC, and the 1st Bn, 3d Regt (ARVN) killed five enemy while sweeping in the vicinity of XDS23361.

At 110900 hours, vicinity XD833362, the 1st Bn, 3d Regt (ARVE) discovered thirty snewy bodies killed by helicopter, and, between the hours of 1845 and

1-22

Inclosure 1 (Operations Margative) to Operational Report - Lessons Learned, 101st Airborne Division (Airsobile), Period Ending 31 July 1970, ROS CSFOR-65 (R2) (V)

1920. discovered 100 enemy killed by air strikes within the past 36 hours.

At 122222 hours, vicinity Y0362188 (Hill 805), Co D, 2d Bn (Ambl), 501at Inf. while in their night defensive position, received 30 to 40 RPG rounds and amall arms fire, from an enemy force, 250 meters to the northeast. The company returned organic weapons fire, and ARA, air strikes and a flareship were employed. Sixteen US were wounded.

At 121355 hours, vicinity XD84D359 (one kilometer north of PS/OB SNAPPER), the 3d Co, 1st Bu, 3d Rogt (ARVN) engaged an estimated 40 enemy with organic weapons fire. A sweep revealed 30 NVA KIA, one RPD machinegum, four RPG launchers, six AK-47s, one 60mm worter, complete, 100 ruckstacks, 35 Chicom grenades, 60 RPG and 120 60ms mortar rounds, 60 Chicon gas masks, and 15 pounds of documents.

Also on 12 July, vicinity M175240, 3 kilometers southwest of FS/CB JEROME, the 3d Co, 3d Bn, 1st Regt (ARVH), discovered the bodies of 65 NVA killed by air strikes within the last 3 - 4 days.

On 15 July, Ceneral William C. Westworeland visited the division.

At 140203 hours, vicinity 10362188, Co D. 24 Bg (Ambl), 501st Inf, while in their night defensive position on Hill 805, again received RPG and small arms fire from an enemy force, 20 meters northwest of their position. The element returned organic weapons fire and employed M55 .50 caliber fire (Quad 50). from FS/GB RIFCORD, and 81mm morter fire, air strikes, and ARA. Contact terminated at 0307 hours and a first light check of the area revealed five NVA KIA. The company suffered sir KIA and nine WIA. At 2253 hours, the company received small arms fire and RPG fire and estchel charges, and at 0159 hours. received thirty-seven 82mm mortar rounds, impacting around their WDP. Organic weapons, ANA, tibe artillery and mortar fire was employed against the enemy. One US was killed in the action. A first light sweep revealed muserous blood trails.

On 14 July, Companies & and B and the Recon Fit, 2d En (Ambl), 501st Inf, in yet another attempt to eject the enemy from Hill 1000, was engaged by RPC. small arms and morter fire, resulting in one US KM and 20 WMA. Organic weapone, ARA, take artillery and air strikes were employed against enemy positions and well fortified bankers on the hill. Partial sweeps of the area revealed five NVA KIA. Elements withdrew to the vicinity of YD325189, where. at 1715 hours, they received 82mm mortar fire without casualties. Artillegy was supleyed on the suspected enemy location.

Operation CLINCH VALLEY was terminated at 151802 July.

At 161815 hours, vicinity 10360186 (Hill 805), Co H, 2d En (Ambl), 506th Inf discovered two NVA killed by artillery within the last 24 hours.

1-23

Inclosure 1 (Operations Marrative) to Operational Report - Lessons Learned, 101et Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

(10) 17 - 23 July 1970

(a) On 17 July, FS/CE RIPCOMD received sporadic mortar first throughout the day with light damage and casualties on the firebase. The enemy employed 120mm mortars for the first time since the firebase was opened in April 1970. The planned extraction of the 2d En (Ambl), 501st Inf was postponed due to high winds in the RIPCOMD area.

The 2d Bn (Achl), 502d lnf moved by air to LZ ANN (vicinity F6/CB VEGUSL), staged, and conducted an assault into three landing zones south of F5/CB BIAZE. The battaling initiated search and attack operations in the ENNESSEE area.

on 18 July, the 2d Bn (Ambl), 501st Inf moved by air from FS/OB RIFCORD to CAMP EVANS and then by vehicle to PHU BAI Combat Base to begin preparation for refresher training and assumed the mission of DHF.

At 181330, a CH-47 in logistical support of FE/CE RIFCORD, was shot down by enemy ground fire and orashed in the 105mm ammunition storage area, causing a major fire and artensive damage on the firebase. All six 105mm howitzers of Btry B, 28 Bm (Ambl), 319th Arty were destroyed. In reaction, the 1st ED (Ambl) (-), 50fet Inf passed to operational control of the 38 Rds, and assaulted into FS/CB CHADIATOR to secure the firebase for insertion of Btry B, 28 Bm (Ambl), 320th Arty. This move was made to insure adequate artillery coverage for the RIFCORD area.

On 19 July, PS/CB RIPCORD continued to receive spondic mortar fire, causing light casualties but not interfering with damage repair and clean up operations on the firebase.

Also on 19 July, the 4th Bm, 54th Regt (ARVN) terminated operations in area Kray and moved by air from FS/OB BRICK to FS/OB ROY and ANZIO.

On 27 July, the 26 Bm (Ambl), 502d Inf terminated operations in search of elements of the 29th NVA Regiment, in the vicinity of MENNESSEE and extracted by air to CAMP EAGLE to refit and prepare for future operations to support insertion of Allied forces into the PS/CS AIRECREE-BRADLEY area.

On 22 July, the 1st Bde passed responsibility for FE/OB HASTOGNE and Area Uniform to 2d Bde. Go A. 1st Bn (Ambl), 502d Inf moved by wehicle from FS/OB BIRNINGHAM to FS/OB BASTOGNE and assumed security of the firebase. Co B. 1st Bn (Ambl), 502d Inf moved by wehicle from FS/OB ARSENAL to vicinity YD6409 and began patrol and surveillance operations in the vicinity of FS/OB BASTOGNE.

Because of the enemy buildup of forces and the increased tempo of enemy attacks in the FS/OB RIPCORD area, it became apparent that the cost and effort required for the self-defense of RIPCORD placed the accomplishment of future

Inclosure 1 (Operations Narrative) to Operational Report - Lessons Learned, 10tst Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

operations in the energy's rear supply and service areas, vicinity of BRADIEY and ADECEMS, in jeopardy.

On 25 July, the 3d Bde directed the extraction of the 2d Bn (Amid), 506th Inf from RS/OB RIFCOND, and vicinity. Extraction from the firebase began at 0545 hours and was completed, despite heavy indirect and 12.7mm machinegun fire, at 1214 hours. Co D, 2d Bn (Ambl), 506th Inf was inserted vicinity YD363178 to assist the extraction of Co A, 2d Bn (Ambl), 506th Inf. Extraction of Companies A and D logan at 1305 hours and was completed without damage or casualties at 1401 hours. Seventy-four USAF, marine and navy tactical air sortier and continuous AHA and tube artillery fires were employed in support of the extraction. The battalion moved to CAMP EVANS to conduct stand down and began preparation for refresher training.

(b) Significant Activities. FS/OB RIPCORD received six attacks by fire from enemy forces employing 60mm, 62mm, and 120mm morters on 17 July, beginning at 0704 hours. The last attack was at 1745 hours. Artillery and tactical air support was employed on suspected enemy locations throughout the day. Results were 14 US WIA and one Kit Carson scout WIA.

At 181350, a CH-47 mircraft from Co A, 159th Avn Bn (ASH) (Ambl.), carrying a sling load of 105mm howitzer ammunition to FS/CB RIFCORD, received 12.7mm machinegun fire while on approach to the firebase. The aircraft crashed into the 105mm ammunition storage point, causing a major fire. Extensive damage was caused in Stry B, 21 Bm (Ambl), 519th Arty, as well as the bankers and TOC on the southern portion of the firebase. Five howitzers from the battery were destroyed and one damaged. An AN/APQ4A counter-mortar radar, two tooms recolliess rifles, and an AN/CRC-163 VHF radio set were also destroyed. The firebase continued to receive sporadic enemy mortir fire throughout the day, mesulting in one US Kia and four US Wia. The crash of the belicopter resulted in one crew member killed and five crew members wounded. In spite of the fire, and exploding 105mm ammunition on the firebase, the perimeter remained intact, and by late afternoon the fires were brought under control and clean up operations began on the firebase. To assist in defending the firebase, artillery fires were increased from ES/OB BARBARA, O'RETILLY and RAKKASAN until Biry B. 24 Bn (Ambl), 320th Arty was laid and ready to fire from FS/OB CLADIATOR at 1837 hours.

FS/CB RIPCORD continued to receive sporadic mortar fire on the firebase throughout the period 19 - 22 July. A total of 34 stand-off attacks were conducted by the enemy during these four days resulting in seven US KIA and 35 US WIA. All but five wounded required evacuation. A total of 51 tactical air strikes were directed into the RIPCORD area between 19 and 22 July.

On 20 July, contact by Co D, 1st Bn (Ambl), 506th Inf and Co A, 2d Bn (Ambl), 506th Inf, east and south of Hill 805, vicinity F3/CB RIPCOED, resulted in mix NVA KIA. Heavy contact at 1730 hours by the 1st Plt, Go D, 1st Bn

1-25

Inclosure 1 (Operations Narrative) to Operational Report - Leasons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (U)

(Ambl), 506th Inf with an enemy famous employing 60mm mortar and small arms fire, vicinity MB76189, resulted in four US KIA and five US WIA. Contact terminated at 1820 hours.

At 210712 hours, vicinity M576192, three kilomaters east of FS/CB RIFCORD. Co D, int Hn (Ambl), 506th Inf, while preparing to leave their night defensive position, received approximately eighty 82mm mortar rounds and small arms fire from an enemy force all around their position. As the company returned fire with organic weapons and employed tube artillary and AMA against the enemy, Co D, 2d Bn (Ambl), 506th Inf air assaulted from vicinity M530240, to an Lz north of the contact area. The company attached to the south to reinforce Co D, tet Bn (Ambl), 506th Inf, making light contact with the enemy enroute, suffering four WIA, capturing a 12.7mm machinegen, and discovering a large banker complex at M572198. Co C, 2d Bn (Ambl), 506th Inf was inserted to destroy the bunker complex.

Co D, 2d Bn (Ambl), 506th Inf linked up with Co D, tet Bn (Ambl), 506th Inf at 1223 hours as sporadic mortar fire continued to impact in the area until 1615 hours. Air strikes and a pink team supported the contact as Co D, 1st Bn (Ambl), 506th Inf suffered five KIA and 31 WIA, and accounted for eight hVA KIA.

At 0840 hours, a UHtH belicopter from Co C, 326th Med Br (Ambl), while attempting to extract casualties from Co D, lat Br (Ambl), 506th Inf area of contact, was hit in the tail boom by an APC round, while in the pick-up zone, and rendered pon-flyable. At 0947 hours, another medevac almoraft from Co C, 326th Med Br (Ambl) was hit by small arms fire in the same pick-up zone, resulting in one crew member killed and one wounded. The aircraft returned to CAMP EAGLE where it was found to be non-flyable. A third aircraft, from Co A, 158th Arm Br (AH), was hit by small arms fire at 1658 hours, while attempting to extract elements of Co D, lat Br (Ambl), 506th Inf. The mireraft crashed and caught fire on the PS. Six other aircraft received ground fire in the RIPCORD area during the day with three being hit by machinegum and small arms fire, all returned to CAMP EYARS and one was found to be non-flyable.

At approximately 1700 hours, Companies C and D, 2d Rm (Ambl), 506th Inf and Co D, 1st Rm (Ambl), 506th Inf were extracted from a pick-up zone at 10572198 and returned to CAMP EVARS to refit and prepare for future insertion into the RIPCOMD area.

At 221700 hours, vicinity YD 553187, 1.5 kilometers nontheast of FS/OB RIFCORD, Co A, 21 Bn (Ambl), 506th Inf received rifle granades, mortar and small arms fire from a large enemy force attacking from the north, east and southeast. Tube artillery, ARA and tactical air support were employed against the enemy. Contact was zaintained until dark when the company consolidated their position and formed a defensive perimeter. Because of the close proximity of the estimated three-company size enemy force, extraction of the wounded was not

1⊷26

Inclosure 1 (Operations Narrative) to Operational Report - Leasons Learned, 101st Airborne Division (Airmobile), Portod Ending 31 July 1970, RCE CSFOR-65 (R2) (U)

attempted during the night. Host of the fifty-one personnel wounded in the company were not serious. Those who had more serious wounds were made as comfortable as possible until they were extracted on the morning of the 25d. Tuelve IS were killed during the day and the company accounted for 61 NVA KIA.

During the night of 22 - 25 July massive artillery and air atrikes were employed in the RIPCOND area against known and suspected enemy locations.

Here than 2200 rounds of mixed caliber artillery assemblian were fired in support of the extraction of the 21 Bm (Ambl), 506th Inf on 25 July. Fourteen CH-47 aircraft were employed commencing at 0545 hours to extract 22 sorties, which included six 155mm howitzers, two M-405 dozers, communications equipment, and one M55 (Quad 50) machinegum. The CH-47 extraction operation proceeded smoothly until 0740 hours, when one CH-47 extraction operation proceeded smoothly until 0740 hours, when one CH-47 extraction on the firebase by 12.7mm machinegum fire. The aircraft was forced to land amidst the 105mm howitzers which had been destroyed on 18 July, and thus prevented the extraction of the artillery pieces and two 106sm recoilless rifles. The CH-47 received a direct hit by an enemy mortar round, musing the aircraft to burn and explode. Eight additional CH-47 aircraft received hits during the extraction, four were later determined non-flyable. Co B, 2d Hm (Ambl), 506th inf began extraction at 0745 hours by UHIH but was dalayed until 0955 hours by heavy one my 60mm and 82mm mortar fire. The extraction was conducted by infiltrating one UHIH aircraft into the fixebase at a time.

During the extraction, PS/CB RIPCORD was under continuous energy mortar fire, with several hundred rounds impacting throughout the firebase. Air, artillery, and ARA destroyed several energy mortar and machinegum positions. In addition, minerous energy, driven into the open by CS were killed by US fire-power.

#### (11) 24 - 31 July 1970

(a) With the extraction of US.units from the FS/OB RIPOND area, the division began an extensive artillery and serial bombardment plan directed against the NVA forces massed in the area. During the period 240600 to 310500 July, over 10,000 rounds of mixed caliber artillery, 135 forward air controlled missions - for 226 sorties - 168 drams of persistent agent CS, and 130 barrels of thickened fuel were directed against known and suspected enemy locations.

On 24 July, the 21 Hm (ambl), 501st lnf completed refresher training at FHU BAI Combat Base and moved by vehicle to CAMP EVANS to prepare for future operations in the vicinity of FE/CB MAKKISAN. The 2d Bm (Ambl), 506th Inf began battalion refresher training at CAMP EVANS.

On 25 July, the 2d Sde passed responsibility for FS/GB RAKKASAN to the 3d Bds as division forces repositioned to increase security of the populated low-lands and support operations in the enemy's rear service support areas, in

1-27

the mountains northeast of the A Shau Valley.

Operation CHISACO FRAK/LAN SON 363 began at 250700 July, as elements of the 1st Bie, in operational coordination with the 31 Regt, 1st Inf Div (ARVN), assaulted into the operational area at 0600 hours. The 2d En (Ambl), 502d Inf assaulted into the FS/OE MUREEN area, seized and secured the firebase, and began assault operations to the west. Company D received fire on their IZ at YD405119. Tube artillery, ARA and tactical CS, dropped from UHIR aircraft, suppressed the enemy fire. There were no US casualties during the assault.

The 1st Bm (Ambl), 502d Inf passed responsibility for FS/CE BASTOCKE to the 3d Bm (Ambl), 187th Inf and companies A and B assaulted into landing zones south of FS/OB BIRMINGHAN and ARSENAL to conduct search and attack patrols.

Co C, let Bn (Ambl), 501st Inf moved by air to F5/GE RAKKASAN and assumed the mission of firebase socurity.

On 26 July, the CF and Co C, 2d Bn (Ambl), 501st Inf moved by six to FS/CB RAKKASAN closing at 1615 hours. Co C assumed mission of security for the firebase.

On 28 July, the light CF, 3d Regt (ARVN) and Btry A (155), 10th Arty (ARVN) moved by air to FS/OB MAUHEEN in support of Operation CHIRAGO HEAK/LAM SON 363.

On 29 July, Btry C, 2d Bn (Ambl), 320th Arty repositioned, by air, from FS/OB PASTOCRE to FS/OB NAURREST to provide additional artillery support for Operation CHESAGO HEAE/LAM SON 363. The battery was replaced on FS/OB BASTOCRE by Btry B, 2d Bn (Ambl), 519th Arty from CAMP SVANS.

on 30 July, division aviation assets, coordinated through the 1st Eds, supported the assembly by the 1st and 2d Battalians, 3d Regt (ARVN) into the CHEAGO MAK/LAM SON 363 area of operation to locate and destroy enemy forces, cache sites, and staging areas. Extensive preparation of the landing zones by tactical air, ARA and tube artillery from both US and ARVM batteries supported the insertion. Light ground to air fire was received during the insertion of the 2h Bn, 3d Regt (ARVN), which was completed at 0859 hours, with no Allied casualties. The 1st Bn was inserted at 1010 hours without incident.

On 31 July, the jet Bde passed operational control of the let Bm (Ambl), 506th Inf to the 2d Bde and assumed operational control of the 2d Bm (Ambl), 506th Inf. The let Bm (Ambl), 506th Inf moved by air from FS/OB KATHRYN to CAMP EVANS, began preparation for battalion refresher training and assumed the mission of DRF. The 2d Bm (Ambl), 506th Inf moved by air from CAMP EVANS to FS/OB KATHRYN, assumed the mission of securing the firebase, and began search and attack operations in the vicinity of the firebase.

Inclosure 1 (Operations Narrative) to Operational Report - Lessons Learned, 101st Airborne Division (Airmobile), Period Ending 31 July 1970, RCS CSFOR-65 (R2) (V)

(b) Significant Activities. On 24 July, vicinity YD245205 (3g kilometers northeast of FS/CH THUNDER), the 2d Bn, 1st Regt (ARVH) discovered 54 NVA bodies killed by air strikes approximately two weeks carlier. Also found were 21 individual and five crew served weapons, including two RFD machine nums.

At 261426 hours, vicinity YD415130, the 3d Plt, Co A, 2d Bn (Ambl), 502d Inf engaged 5 - 4 enemy in bunkers, at 35 meters, with small arms, morter fire and ARA, resulting in the first three enemy killed during Operation CHISAGO HEAK/LAM SON 363. Nine 15'x10'x4' bunkers with 3' overhead cover were destroyed.

At 281827 hours, CAMP EVAMS received four 122mm rocks to impacting near the mass hall of the 156th Avn Bn (AH) (Amhl). ARA, tube artillery and a white team more employed on a suspected enemy location. The 3d Ede security platoon was inserted in the vicinity of YD450325 and discovered four 122mm rocks to in launching treaches. Results of the attack were one US KTA and 15 US WTA.

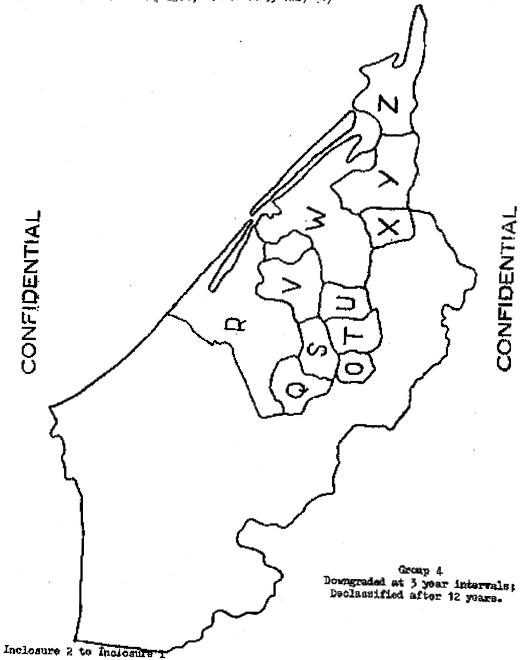

At 290905 hours, CAMP EVANS received another three 122mm rockets, impacting in the vicinity of Btry C, 4th Dn (Aerial Arty), 77th Arty (Ambl), Co C, 158th Avn Dn (AH) (Azbl), and the 2d Bn (Ambl), 506th Inf. No casualties or damage were caused.

The 2d Bn, 3d Regt (ARVN) made contact with the enemy almost immediately after insertion, vicinity M358097, on 30 July. The 1st Co received small arms fire from an enemy force 100 meters to the north at 0816 hours. The element returned organic weapons fire and employed ARA and a pink team. A sweep resulted in the capture of a 12.7mm machinegen. At 1020 hours, vicinity M348103, the battalion engaged an estimated enemy platoon with small arms fire at 30 meters. The enemy returned small arms fire and withdrew to the north. An air strike was employed. A sweep of the area revealed it NVA KIA and resulted in one RFD machinegen captured. At 1315 hours the 1st Co killed an RVA at M358097, and, at 1500 hours, killed four more RVA.

On 31 July, the 1st Co, 21 En, 3d Rogt (ARVN) discovered 17 enemy bedien killed by air strikes approximately three days earlier, at 10357115.

#### CONFIDENT LL

and the inner belt of protective wire. Although indications are that the ammunition explosion resulted from a well placed NVA satchel charge, it is possible that it was caused by a hand grenade thrown from a US Fighting position.

LICSON LEAPHER a. Sufficient ammunition must be stored at primary, alternate, and supplementary fighting positions to defeat a determined tapper steach.

- $\mathbf{h}_{i}$ . But amountines storage areas will be a target during a support attack.
- c. Sulk ammunition must be protected and stored at a minimum of two invations.
- d. Ammunition storage areas should not be located between the line of fighting positions and the protective wire.

observation: The attacking force had been in a staging area reconnottering FSB Tombhawk and preparing for the attack for a period of seven days. On the last two days (8 and 9 June) prior to the attack, one NVA soldier hid in shoulder high prass 400 to 500 meters from the perimeter and observed the position for 48 hours. At 092200 June, he determined the time was right for attack. He moved to a rally point and led the attacking force to the firebase.

LECTION LEAPHER: a. Mormally, the capper will spend severaldays reconneitering a firebase prior to attack.

b. Fields of fire and observation must be cleared well beyond the limit of protective wire.

ORCEPVATION: The traiging area used by the tappers was within a short walking distance of the firebase. The unit had not patrolled the area for a period in excess of nine days.

LECTION LEARNED: When occupying a firebase, the unit must confineally. But in random patterns, patrol to a range of \$600 meters (82mm murtue range) around the position.

OBSERVATION: During the period 31 May through 8 June, the defendive targets were fired between 2300 and 0200 hours. On 9 June, the "King of the Hill" decided to vary the pattern and conduct the firing from 0200 to 0400 hours. When the attack began, the artillery forward observer was preparing to adjust the firebase defensive targets.

LECTON LEARNED: Detailed planning is required to vary time and type of activity to avoid establishing and patterns of defense.

OBSERVATION: During the sappers withdrawal, they moved through an area approximately 500 meters from the perimeter which had been sacded with trip flares. When the flares were activated, the area was engaged with cannon artillery to block enemy escape routes.

LESSON LEARNED: Trip flares placed well forward of the perimeter on likely avenues of approach or escape will provide early warning of attack or indicate routes of withdrawal.

OBSERVATION: An anti-sapper fence, consisting of chain link fencing four feet high and buried one to six inches, had been placed around the firebase. Examination following the attack revealed that the sappers had been unable to cut the fence. All breaks in the wire were caused by explosions.

LESSON-LEARNED: Protective wire, properly emplaced, is an effective barrier to sapper movement.

OBSERVATION: Upon initiation of the attack, the "King of the Hill" ordered his artillery forward observer outside the command bunker to adjust defensive targets and ARA. He also instructed the platoon leader to move to the point of contact to survey the situation and to subait an accurate SITREP.

LESSON LEARNED: Aggressive leadership is required to insure that proper action is taken by subordinates.

OBSERVATION: Due to a personnel shortage, LP/OPs and ambushes were not employed outside the perimeter. The "King of the Hill" stated that his defensive plans included employment of an LP/OP on the approach route used by the NVA. However, personnel shortages required him to employ all available personnel on the perimeter.

LESSON LEARNED: When determining personnel requirements for firebase defense, sufficient allowance should be made to man the perimeter and to employ early warning LP/OPs and ambushes.

OBSERVATION: During the week preceding the attack, the "King of the Hill" conducted walk-through rehearsals of the defensive plan to include the assembly and movement of the reaction force. At the initiation of the attack, the reaction force was assembled and later moved to the point of the main attack.

LESSON LEARNED: Frequent and planned rehearsals of the firebase defensive plan, to include the assembly and employment of the reaction force, insures proper and timely response by defensive forces.

OBSERVATION: The "King of the Hill" had directed that personnel

on guard occupy fighting positions rather than positions within or on top of sleeping bunkers.

LESSON LEARNED: Guard personnel are less vulnerable to RPG and sapper attack when manning fighting positions rather than positions on top or inside sleeping bunkers. Additionally, more effective fire can be delivered against the attacking sapper.

OBSERVATION: The C-130 flareship could not, for an undetermined reason, communicate directly with the "King of the Hill." Instructions for "Basketball" were relayed from the "King of the Hill" through the battalion command post to the C-130. This is an acceptable, but less desirable, arrangement.

LESSON LEARNED: The "King of the Hill" should communicate directly with all supporting aircraft.

OBSERVATION: By a study of intelligence reports and enemy activity occurring one year ago, the battalion commander determined that FSB Tomahawk was attacked on 19 June 1969. He advised the "King of the Hill" that NVA sapper attacks against firebases are sometimes repetitive from year to year and that due to a lack of flexibility in planning, NVA operations follow definite patterns.

LESSON LEARNED: Commanders should study one year old intelligence reports and enemy activity.

OBSERVATION: The platoon responsible for defense of the firebase had been there for nine days and had rehearsed the firebase defensive plan three times during that period.

LESSON LEARNED: With proper leadership and frequent walkthrough rehearsals, the assurance of a successful defense increases the longer the unit stays on the firebase.

OBSERVATION: On 1 June 1970, the 2d Bn (Amb1), 327th Inf received an agent report indicating the NVA would attack Lang Co Bridge on 9 or 10 June. The report also stated that the NVA would be wearing ARVN uniforms. One NVA sapper was observed wearing a US heimet and long trousers.

LESSON LEARNED: Intelligence information should be passed to the lowest echelon possible (the individual soldier) consistent with security restrictions.

OBSERVATION: Seven fougasse wires and several trip flares positioned outside the inner belt of protective wire had been cut or tied off.
